Professional Summary

Accenture - Technical Lead

July 2018 - present

Project 1 : DCS -(Insurance Application) July 2019 - present

- The project is the middleware application which lies between the UI where the customer/agents fill in the required details for opting an insurance and the printing system which prints the final Insurance documents and sends them out to customers. The application's main focus is to gather all the data to do some pre-processing and call multiple services depending on the inputs received and do some marshalling before calling each service and send out only the required information to the printing system and handling the response
- Implemented **Spring Boot REST** based **microservice** applications using **Java 8, Java 9** features along with **Spring Reactive Programming, Spring Cloud Stream RabbitMQ Message Queuing System, Redis Cache, Non-Relational MongoDB, Config-Server** in an **Agile** Environment
- Played a major role in designing and migrating the monolithic application to microservice applications deployed on PCF. The huge application was split based on different flows it handles
- Proposed a design solution to fix a long term problem of manually loading the data into MongoDB and notifying the consumer application each time the data is loaded, by automating the process using **Jenkins** and a combination of windows programming and **mongoimport** utility
- Leading the team in understanding and working in migrating process and moving towards Microservices development methodology
- Other Tools & Tech Stack: **Microservice Architecture, Design Patterns, Hibernate, Ember JS, Basic knowledge on React, SOAP Web Services, XML, JSON, Velocity & FreeMarker Templates, Maven, Swagger, GIT, Bit bucket, UCD, Splunk, PCF, Oracle, MY SQL, AEM Tool, SOAP UI, Postman, SVN, Liberty, Tomcat Server.**

Project 2 : Data Once(Banking Application) July 2018 - July 2019

- Application basically handles new account/product/entity creation , for associating with the bank and handling the account related operations and request creations , handling the tax documents etc
- Worked on microservice application registered on **eureka** and deployed on PCF for onboarding the new banking customers who open the account with the bank
- Upskilled myself and worked as a full stack developer for 6 months on **Ember.js** based on the knowledge i had on **React.js** as there was an immediate requirement in my project.
- Worked on development of e-forms which are basically editable PDF forms for online submission using the tools called **LiveCycle Developer** and **Acrobat Pro**

Infosys - Technology Analyst

Jan 2018 - July 2018

Project 1 : CloudTail OCM

Jan 2018 - July 2018

- Implemented security system based on encryption and decryption algorithms for a Database driven Oracle Application which maintained seller transaction details in one of the popular online shopping website

Capgemini - Associate Consultant

July 2014 - Jan 2018

Project 1 : CorFlow Underwriting (Reinsurance Project)

Aug 2015 - Jan 2018

- The application is mainly meant to serve the underwriters and to fetch the Policy Report of each individual or based upon various regions and other criteria and displays the results in both Tabular format(with Customized filters) as well as Graphical Format
- Worked on development and enhancement of **JAVA - SOAP WS** based **GWT** Insurance Application with **Maven** build tool which handles all the stages of policy right from the time customer opts for policy till it is expired/claimed
- Other Tools & Tech : **Eclipse, RAD, WebSphere Server**

Project 2 : CorFlow Template Development (Reinsurance Project) July 2014 - Aug 2015

- The project focussed on creating Insurance documents for the customers dynamically using a Tool
- Worked on Template Development Tool called **Assentis** for developing dynamic Insurance templates using **XML**

Awards & Appreciation

- Have got Star of the month multiple times in Accenture
- Have achieved X-tra Mile Award for proposing OOB solution for providing a design solution in Accenture
- Have got Star Player and Pat on the back awards during my tenure in Capgemini

Education Summary

Qualification	School/College	University/Board	Year of Passing	Percentage
Bachelor of Engineering B.E(ISE)	Acharya Institute of Technology, Bangalore	V.T.U, Belgaum, Karnataka	2014	76.66%
Pre-University	Sri Chaitanya PU College	Karnataka State Board	2010	79.60%
10 th Standard (S.S.L.C)	St. Mary's Convent School	Karnataka State Board	2008	89.70%
