EXPERIENCE(4+ Years)

ATCS/Nagarro | Software Engineer 2
05/2022 - Present | Jaipur, Rajasthan
- Created a Digital Marketing Engine is a simplified application designed for users to promote their business in global digital market based on market and customer demands.
- This Digital Marketing Engine helps in social listening from various social media applications like Twitter, Facebook, Instagram, YouTube and many more and gives a consolidated viewpoint of end users based on certain keywords, based on which the business users plan their marketing strategy. It aims at proving the target audience to marketer and thus reducing the marketing cost by large number.
- Participated in Agile development processes, including sprint planning, daily stand-ups, and retrospectives, to deliver iterative software releases.
- Developed new feature for the application and maintained the existing one.
- Actively seek and incorporate feedback from users and other team members to improve the user experience.
- Work within project timelines and provide accurate estimates for frontend development tasks.
- Technology Stack: JavaScript, React, Redux, HTML, CSS, JSX, MUI charts, Jenkins.
