## Summary

---

Enthusiast Salesforce Developer with approx. 4 years of hands-on experience in designing and developing scalable, reusable solutions. Skilled in Salesforce Configuration, Development, Integration, Data Migration, Deployment, Customization (APEX, LWC, VF, TRIGGERS), JavaScript, jQuery, AngularJs and SQL.

## Certifications

---

- Salesforce.com - Platform Developer II
- Salesforce.com - Platform Developer I
- Salesforce.com – App Builder
- Apttus - Contract Lifecycle Management
- Apttus - Configure Quote Price

## Skill Set

---

All the skill set that I have listed below is what I have developed with the Hands-on experience

SFDC	<div><div></div></div>
APEX, Visual Force, LWC, SOQL, SOSL	<div><div></div></div>
APEX Data Loader, Workbench	<div><div></div></div>
AngularJS, JavaScript, NodeJS	<div><div></div></div>
Triggers, Workflow Rules, Process Builder, Flow	<div><div></div></div>
Reports and dashboards	<div><div></div></div>
Deployment using Change Set and Eclipse	<div><div></div></div>
Apttus	<div><div></div></div>

## Project Experience

---

### Indirect Channel Partner Portal (GE Healthcare)

ICP is the standalone portal on SFDC, build completely with the Lightning Experience. This Solution is having complete solution which are having multistage process like Onboarding, KYC(Know your customer), CLM(Contract Lifecycle Management) etc.

**Role:** Developer

#### Responsibilities:

- Involved in Design Discussion (Techno functional) for the System

- Worked with Apex Classes and LWC for meeting the Requirements

### Contract Lifecycle Management (GE Healthcare)

CLM is the customized solution built with the combined features of SFDC and Apttus, which provides the users to deal with Creation, Clause Creation, Approvals, Continuous Monitoring etc. of the Master and Transactional Contracts with the Customer.

**Role:** Developer

**Responsibilities:**

- Involved in Design Discussion (Techno functional) for the System
- Worked with Apex Classes, Triggers, Visualforce pages, AngularJS, LWC, Apttus to develop the complete solution
- Involved in Data migration from Legacy System

### Configure Price Quote (GE Healthcare)

This is the whole and sole ecommerce like platform build with help of Apttus for Internal Users, which is having features from Configuring Big products to placing the Order to Order management tools.

**Role:** Developer

**Responsibilities:**

- Involved with Multiple development and POC activities
- Worked majorly on Apttus, Apex Classes, Triggers, Process Builders, Workflows and Visualforce
- Involved in Admin Activates like Profiles, Sharing etc. required for the Projects

### Recommended Products (GE Healthcare)

This is the framework developed to get the recommendation by understanding the Data from the Salesforce. This will analyses the data related with customer and will show the preferred Products to be sold which will increase the Productivity of Salesperson.

**Role:** Developer

**Responsibilities:**

- Involved with complete development of this framework
- Technologies used like AngularJS, Apex Classes, JavaScript

### Monitoring Bots (GE Healthcare)

Complete solution to identify the performance of the SFDC system using Autonomous Bots. Also, this will store the logs from the bots and visualize performance in Salesforce Reports and Dashboards.

**Role:** Developer

**Responsibilities:**

- Developed complete Standalone Tool
- Visual representation and insights from the data provided from Bots

## Academics

---

- **MTech in Computer Science and Engineering**

VIT Vellore (JUNE 2015-MAY 2017)

- **BTech in Information Technology**

VJTI Mumbai (JUNE 2010-MAY 2014)

## Recognitions

---

- CIO awards for Apttus/SFDC Platform Performance, Stability and Delivering CLM Solutions
- Leader of Winning Team in Hackathon for building Recommended Products functionality on cart page of Apttus in AngularJS and Python

## Publications

---

- Efficient Resource Management in Cloud Computing (IJET 2016)
- A review on Service-Oriented Software Engineering (IEEE 2016)
- Healthcare Products Management and System Analysis in Cloud Computing Environment (ACST2017)

## Activities

---

- Active Volunteer and CSR
- Marshal Art (Black Belt Holder)
- Musicophile
- Travelling and Trekking
