## EDUCATION

M.tech **Bits Pilani**, 2020  
From Bits Pilani under the  
Program WILP(Wipro  
Integrated Learning  
Program)

CA **Guru Nanak dev  
University**, Amritsar,  
2016 GPA: 63.9

# SHUBHAM SHARMA

## PROFESSIONAL SUMMARY

- i) Experienced PL SQL Developer with over 4.5 years of experience in Wipro Technologies. Excellent reputation for resolving problems and improving customer satisfaction.
- ii) Understanding Backend Requirements,oracle level documentation,implement the requirements,database design.
- iii) Engineering Professional having about 4.4 years of Oracle developer experience in finance accounts Expertise in database designing, execution, reviewing, developing scripts,developing stor proc.
- iv) Working in agile & Scrum methodology. Responsible for developing proc according to middleware requirements.
- v ) Hands in backend development, database design,cursor,triggers,stor proc and CLOB objects to pass data in XML format Worked on Core java based (Minor Enhancement) applications Familiar with Programming Fundamentals (Structured Programming and Object Oriented Programming).
- vi) To build a career which makes me adroit, enhance my knowledge, skills and give me adequate opportunity to exploit my innate potential.

## SKILLS

- SQL development
- PL-SQL coding
- Code reviews
- Agile
- Database programming
- Database management software
- Solutions deployment
- Database design
- SQL analytics
- Portable code writer

## WORK HISTORY

December 2016 - Current **Wipro Technologies - PLSQL Developer**,  
Pune, India

- Maintained complex SQL queries, views and stored procedures in multi-database environment with little supervision.
  - Drove data analysis, resolving complex business issues and proposing long-term system solutions.
  - Developed, implemented and optimized stored procedures and functions using PLSQL.
  - Analyzed existing SQL queries to identify opportunities for improvements.
  - Developed custom database objects, stored procedures and delivered application support.
  - Devised high-quality database solutions ranging in size and complexity, increasing productivity and improving data sharing.
  - Created optimal technical solutions to user needs through research and in-depth system analysis.
  - Managed workload independently but collaborated with colleagues to complete larger scale tasks in distributed team environment.
- 

## **ADDITIONAL INFORMATION**

- Understanding and Analyzing user Requirements. Creating Database design, implementation of database. Updating stored Proc and Test stored proc. Tracking Changes, Preparing Reports and Updating Documents. Inter and Intra Team Communication. According to business rules made Minor Enhancements on Core java based applications
