SUMMARY

Application developer with 6+ years of experience, including 4+ years as a React developer. Proficient in identifying web-based user interactions and designing and implementing highly responsive user interface components using React concepts. Skilled in writing application interface code via JavaScript and ReactJS workflows.

Professional Experience:

Front-End Developer(React).   Nov '21 - Jan '24

Accenture: |Project:LMS-UI| Hyderabad

- Worked on the LMSUI (Limit Management System) banking application its a desktop application used for tracking the amount utilization and updating the status of all users.
- We are responsible for managing policies and authority grid for the application.
- Reviewed and approved limit workflow for the application, ensuring compliance with set limits and guidelines.
- Utilized Openfin and React JS as frontend technologies for application development.
- Optimized the components to improve performance and efficiency of application.
- Developing responsive web pages and Integration of Restful API and Graph QL services.
- Gathering client requirements, project planning & discussion with clients on upcoming developments and updates.
- Performed unit testing and Jest backend using MongoDb in order to ensure the quality and functionality of the application.
- Troubleshoot customer issues and communicate effectively to internal and external stakeholders

Project Engineer (Front -End)

Wipro LTD |Project:MS-Teams | Feb '20 - Oct '21

                                                                       Hyderabad

- Woked on Microsoft Teams application for both desktop and mobile platforms.
- For state manegement we have used **Context Api .** We have used **Yarn** instead pf **NPM**
- Roles and Responsibilities are Design, build and maintain efficient, reusable, and reliable code.Integration of Restful API and Graph QL services.
- Developed new features and enhancements for the application using React and TypeScript
- Managed bug resolution from work item creation to raising pull requests.
- Ensured approvals were obtained for the implemented changes
- I have worked on share-tray feature and I have fixed some bugs according to customer requirement
- Interacting with the clients on upcoming developments and updates.
- Performing **Unit testing & cypress testing** as per the requirements.

Project Engineer (Front-End):   Jun '19 - Jan '20

Wipro LTD |Project:HP internel web| Hyderabad

- Worked on internel HP web application this application was responsible for building a configuration for a series of products and services offered by the client .
- In this project I worked on two modules I have fixed the UI defects according to client requirements.
- It had authentication and authorization using the JWT token. It also used the **ApolloClient+GraphQL** for querying the database.
- Develop and maintain single-page web applications with the latest technologies by producing clean, efficient, and optimized code.
- Participating in analysis, design, build, unit test, deployment, and support of the application systems.
- Making use of manual and automated methods to test the quality and reliability of code.
- Actively participate in code reviews, analyze results and choose the best solution.

Associate Analyst   Jun '17 - May '19

Wipro LTD |Project:Google Mpas| Hyderabad

- Prior to React Developer I have worked on **Google maps** and my daily works include
- Analysing spatial data through the use of mapping software, discovering patterns and trends through spatial mapping of data.
- Designing digital maps with geographic data and other data sources.
- heck all layers of maps in order to ensure accuracy, identifying and marking errors and making corrections.
- Creating "shape-files" to merge topographical data with external data by layering external data over a topographical map.
- Producing maps showing the spatial distribution of various kinds of data, including universities and hospital Locations,
- Monitor mapping work and the updating of maps in order to ensure accuracy, the inclusion of new and/or changed information, and compliance with rules and regulations.
