Project - 2

Title: Maxis

Technology: .Net, MySql.

Tools: Jira.

Description:

Maxis is telecom giant and the Operation System Support (OSS) is an integral part of providing reliable and efficient services to customers. OSS ensures all the services are running at optimal level at all time and setting up on new equipment's. As their day to day activity impacts end customer, their response time to break down/service stoppage has to be quick. To enable the team to work efficiently they need information and data at easy and faster rate. The current system is managed through worksheets, extracting data from other applications.

Roles and Responsibilities:

- Understood the business flow properly and prepare test scenarios.
- Involving in writing, reviewing and executing test cases.
- Involved in Usability Testing, Functional Testing, Smoke Testing, Regression Testing, Adhoc Testing, Compatibility Testing and UAT.
- Logging and tracking bugs using Bug tracking tool.
- Communicate effectively with development team and other application owners at various stages of Bug Life cycle.
- Prepared Bug report.

Project - 3

Title : Rapid7 OnePrice CPQ

Technology : Salesforce CPQ

Tools : TestRail, JIRA

Description:

Rapid7 Inc. is a managed cloud computing company focused on delivering IT as a service.

Rapid7 helps customers of all industries, sizes and locations, across private and public sectors, realize the power of digital transformation without the complexity and expense of managing it on their own.

Rapid7 comprehensive portfolio of managed services across applications, data, security and infrastructure on the world's leading public and private cloud platforms enables to provide unbiased expertise.

Roles and Responsibilities:

- Involved in writing test cases in Testrail and these test cases can be directly linked to the Jira story thereby can be executed and tracked on jira. We some times even export the test cases for jira to CSV format and attach on prep tasks.
- Involved in running a round of regression manually everyday that covers the End To End flow from Account creation to Renewal of the Contract.
- Involved in working on stories that majorly concentrate on Amendment and Renewals of Contracts and ensure that the blockers are not introduced when a new feature is developed.
- I have Involved in validated several validation rules, fields creation(whether they are according to the R7 standards of camel case) , workflows, process builders, Configuration changes.
- The flow starts from Quote creation, making it Primary and getting approved, Quote document generation, Opportunity close submission, Order creation, Sending to NetSuite, Order activation and processing in NetSuite to Contract creation and activation through successful fulfillment response.

Project - 4

| | |
|-------------------|---|
| Title | : BITS Pilani Application Centre |
