## PROJECTS

### Automatic Room Light controller with Bidirectional Visitor Counter.

It helps to conserve energy as appliances will be turned off when no one is there in the room.

### IoT based Smart Garbage Collecting Vehicle (Kachra Gaadi)

The present solid waste management system can be made smarter by adding features like location tracking to ensure daily disposal of garbage. This will also gives facility to the people of untimely disposal of garbage produced by them.

### College Enquiry Chatbot

This new communication instrument has all the potential to redefine online counselling services in academia. It will drastically reduce waiting time in reverting to students' queries.
