**Languages** : Tamil (Mother Tongue)  
: English (Business Fluent)

## CORE COMPETENCY

- Willingness to learn new technologies and products with the ability to understand and quickly implement product features.
- Ability to think innovatively to bring ideas into implementable solutions.
- Strong understanding in product installations and implementations.
- Strong debugging skills in implementation projects.
- Excellent data visualization and documentation skills.

## EXPERIENCE

### TATA Consultancy Services

Feb 2017 - PRESENT

#### Blue Yonder Technical Developer

- Implemented the end to end configuration of Blue Yonder/JDA solution of Order Sequencing and slotting (OSS) with a two-tier architectural set up in the Windows 2016 Server.
- Configured the SAML 2.0 authentication to the OSS using Azure AD.
- Involved in integrating the application with AWS ALB.
- Implemented sequencing solution (BY/JDA Sequencer) by integrating with ERP for effective engine build.
- Have experience in installing and setting up the WebLogic Domains (12.1), JDK 1.8, Oracle Client 12.2 for the implementation project.
- Involved in Requirement gathering and prepared high-level design, designed and developed technical solutions for handling business logics using PL/SQL.
- Implemented Reporting solution for effective inventory tracking using Microsoft Power BI.
- Configured alert monitoring to check the application availability through power shell scripts and configured the tasks using windows task schedulers.
- Experienced in applying BY/JDA patches for the BY products.
- Upgraded the BY/JDA Demand Manager from 6.3 to 8.1 which included a full-scale implementation activity like procuring new servers, setting up the pre-requisites for installation, product installation.

---

#### PL/SQL Developer

- Developed PL/SQL packages/procedures to perform data loading, error handling and logging.
- Created jobs and programs in job schedulers like Appworx to trigger DB Procedures, Functions and Packages.
- Incorporated Agile methodology to deliver the Modernization project and have hands on experience on Agile tools like JIRA.
- Created the Solution Design for the end to end implementation of the BY/JDA Order Sequencing and Slotting 2018.1.0 (configurable Sequencing Solution used for sequencing Work Orders downloaded from the ERP system).
- Created the Solution Design for the BY/JDA Demand Manger.
- Developed PL/SQL functions to make a Web Service call to invoke Middleware ODI jobs to ingest the data from source to destination and vise versa.

---

### L3 Technical Support for BY and PTC Applications

- Resolved issues related to production support on applications like BY/JDA Demand Manger, BY/JDA Pricing, BY/JDA OSS, Xelus Parts (PTC) and Xelus Extend (PTC).
  - Customized the BY/JDA Demand Manager product by creating new measures, custom computations and worked on Adhoc user requirements.
  - Contributed to value-adds like automatic reports generation, in order to give visibility to the real time data to the users for better supply chain planning.
  - Prepared BABOK standard design documents for SC IT applications.
- 

#### EDUCATION

Course	Institution	Year of Completion	Marks %
M.Sc. Business Analytics	BITS PILANI	2019-Present	8.74 CGPA
B.E. Mechanical Engineering	Anna University	2016	7.47 CGPA
XII	Union Christian Matriculation School	2012	91%
X	Union Christian Matriculation School	2010	86%

---

#### Technology Summary

Operating Systems	Windows, Unix
Tools	Appworx, Windows PowerShell, Toad, WinSCP, Putty, JIRA, Remedy, ServiceNow
Methodology	Agile, Waterfall
Products	BY - Demand Manager, BY - OSS, BY - SCPO, BY - Demand, BY - ESP, BY - Platform, Xelus Parts, Xelus Extend
Database	Oracle 10g,11g,12c,AWS DB
Programming Language	PL/SQL, Python, R, Oracle SQL
Scripting	PowerShell Scripting, Python
Techniques	Business Statistics, Probability, Regression Analysis, Time Series Forecasting

---

#### HONORS

Star Performer Award  
TATA Consultancy Service

Mar 2019
