### CAREER OBJECTIVE:

Experienced Angular Developer with a proven track record of delivering high-quality and scalable web applications. Seeking to leverage my in-depth knowledge of Angular, TypeScript, and front-end technologies to lead and contribute to complex projects. Committed to optimizing application performance, enhancing user experience, and implementing best practices to drive innovation. Aspiring to join a dynamic team where I can share my expertise, mentor junior developers, and contribute to the continuous growth and success of the organization.

### PROFESSIONAL EXPERIENCE:

#### e-Zest Solutions, Pune

Senior Software Engineer

April 2022 – current

- Front-end Development : Angular developers are primarily responsible for developing and maintaining the user interfaces of web applications using the Angular framework. This involves creating responsive, visually appealing, and user-friendly interfaces that meet the design and functionality requirements.
- Angular Expertise: We should Use Angular framework, including its core concepts, such as components, services, modules, templates, directives, and dependency injection.
- Coding and Testing : Writing clean, modular, and maintainable code is essential. As Developers, we should follow coding best practices, use design patterns, and ensure proper code documentation. Thorough testing, including unit testing and end-to-end testing, is crucial to ensure the quality and reliability of the application.
- Collaboration : Angular developers often work closely with UX/UI designers, back-end developers, and product managers to create seamless and integrated solutions. Effective communication and collaboration skills are important to understand requirements, provide input, and contribute to the overall development process.
- Optimization and Performance : Developers should optimize the application for performance by minimizing load times, optimizing rendering, and handling data efficiently. This involves techniques such as lazy loading, code splitting, and using performance analysis tools.
- Troubleshooting and Bug Fixing : Identifying and resolving bugs, issues, and errors in the application is part of an Angular developer's responsibilities. This requires strong problem-solving skills and attention to detail.
- Security : Developers should be aware of potential security vulnerabilities and follow best practices to secure the application against common web application threats.
- Code Reviews : Participating in code reviews to ensure code quality, consistency, and adherence to coding standards within the development team.

#### Brainbees Solutions Pvt Ltd, Pune

Software Developer

Nov 2020 - March 2022

- Back-end Development: Design, develop, and maintain server-side applications using Node.js and its frameworks i.e. Express.js.
- API Development : Create and implement RESTful APIs to facilitate communication between the front-end and back-end systems.
- Database Management: Work with databases on PostgreSQL to handle data storage, retrieval, and manipulation.
- Server Deployment : Deploy Node.js applications on web servers on Apache and configure them to ensure optimal performance and security.
- Integration with Front-end: Collaborate with front-end developers to integrate the server-side logic

with the user interface, ensuring smooth data flow and interaction.

- Real-time Application : Develop real-time applications like chat systems or online gaming using technologies like WebSockets.
- Authentication and Authorization: Implement user authentication and authorization mechanisms to secure the application's resources.
- Error Handling and Debugging : Identify and resolve bugs, errors, and performance issues in the code, and conduct thorough testing to ensure reliability.
- Code Versioning : Utilize version control systems like Git to manage and track changes in the codebase and collaborate effectively with other developers.
- Optimization and Performance Tuning: Optimize server-side code for maximum performance and efficiency, ensuring the application can handle high traffic and load.
- Security : Implement security best practices to protect the application from common web vulnerabilities, such as XSS (Cross-Site Scripting) and CSRF (Cross-Site Request Forgery).
- Testing : Write and execute unit tests and integration tests to maintain code quality and ensure proper functionality.

### **iNfy Solution, Pune (Client : 828Logistics, USA)**

Full Stack Developer

**Sept 2016 - Nov 2020**

- Web Development: Collaborate with the development team to design, develop, and maintain web applications, ensuring high performance and responsiveness.
- Front-end Development: Implement user interfaces using HTML, CSS, and JavaScript frameworks like Angular. Create visually appealing and user-friendly layouts.
- Back-end Development: Work on server-side logic, database design, and API development using ASP.NET core
- Database Management: Design and implement database schema, handle data migration, and perform CRUD (Create, Read, Update, Delete) operations.
- Version Control: Utilize version control systems like Git to manage and track changes in code and collaborate with other developers effectively.
- Bug Fixing And Testing: Identify and debug issues in the code, conduct unit tests, and participate in code reviews to maintain code quality.

### **SOFTWARE SKILL SET:**

Languages	:	C, Python
Databases	:	SQL server, MySQL, SQLite
Frameworks	:	ASP.NET Core, Angular 2/4/5/6/8/12
Web Technologies	:	HTML, CSS, JavaScript, MVC, Nodejs
Operating System	:	Linux (Ubuntu), Windows
Web Services	:	RESTful APIs, SOAP(familiar)
Tools	:	Visual Studio Code, Git, Jira, Confluence, Swagger
Development method	:	Agile Model

### **EDUCATIONAL & PROFESSIONAL CREDENTIALS**

Master of Computer Application; 2015; Pune UNIVERSITY

Bachelor of Computer Application; 2012; Amravati UNIVERSITY

HIGHER SECONDARY CERTIFICATE; 2008; Amravati BOARD

SENIOR SECONDARY CERTIFICATE; 2006; Amravati BOARD

**Date of Birth** : 6<sup>th</sup> Dec 1990

**Hobbies**: Finding New ways as per Environment.

**References**: Available on Request
