

# SHUBHAM GUPTA

## SKILLS

---

- C++
- Python
- Data Structure & Algorithms
- RDBMS
- Linux
- Operating System
- Flask

## PROJECTS

---

### Coffee Shop Full-stack

June 2020

Keys Skills: Flask, Authentication and Authorization, Python.

Link: [github.com/shubhgng/coffee\\_shop](https://github.com/shubhgng/coffee_shop)

- Created a coffee shop full-stack web application, which allows a different level of user different level of view.
- The application allows the public user to view the drink name and order the drink. For the barista to see the recipe information and for the manager to create a new drink and update the existing drinks.

### Trivia API

May 2020

Keys Skills: Flask, REST API, Python.

Link: [github.com/shubhgng/trivia\\_app](https://github.com/shubhgng/trivia_app)

- Created an endpoint to handle GET and POST requests for categories like display the question, delete the question, search question, and play the quiz.
- Tested the endpoint using Test Driven Development.

### FYYUR: Artist Booking Site

April 2020

Keys Skills: Flask, Python, PostgreSQL.

Link: [github.com/shubhgng/Fyyur](https://github.com/shubhgng/Fyyur)

- Created an artist booking site in which I have provided inserting and deleting various fields such as post a venue/artist, delete a venue/artist, etc. were provided.
- Used Flask Web Framework for development and PostgreSQL for making the table and storing the data.
