REST API

GIT

## PERSONAL PROJECTS

Affiliated Crawl E-Commerce (PHP, MYSQLI)

- The project consists of designing and implementing an efficient general-purpose web crawler. A web crawler is an automated program that accesses a web site and traverses through the site by following the links present on the pages systematically. The main purpose of web crawlers is to feed a data base with information from the web for later processing by a search engine; purpose that will be the focus of the project.

Online interview Management System (Asp .net C#, Sql)

- In this Interview Management System (HR Portal), HR(Admin) can maintain all records of candidate effectively and can easily search record of any candidate and give the immediate results of conducted Interviews.
