1. Project : Alcohol Tracking App

Description : In this project we delivered salesforce application to track consumption of alcohol by a patient. Patient and doctor both can see the dashboard where they can see how they are progressing on their alcohol consumption goals. Doctors can recommend treatment by viewing current consumption.of a patient.

Responsibilities :

- Developed lightning web components as per requirement.
- Developed CSS and JavaScript and SLDS and validation rules.
- Developed progress report chart using chart.js.
- Used Data Loader for insert, update, and bulk import or export of data from Salesforce.com objects.
- Developed various Custom Objects, Actions, Buttons, Tabs, Components, relationship and Custom links.
- Worked on creating Lightning Pages inside Lightning Community Builder.
- Using Community Builder create community pages for customers.

2. Project : Salesforce Einstein Analytics

Description : In this project we used Einstein Analytics for creating Reports

and Dashboards to show Revenues, Cumulative Revenues and other data of products according to the selected filters.

Responsibilities :

- Developed Datasets, Dashboards, Apps, Tables as per requirement.
- Developed Aura Components as per requirement.
- Show data in different charts as per requirement.
- Show data in missing months as per requirement.
- Show Revenue and Cumulative Revenue in stacked graph as per requirement.
- Create story as per requirement.
- Used SAQL to create charts.

3. Project : Expensify Integration with Salesforce

Description : When we generate expenses in Expensify and need to update the expense Approved, Rejected and Reimbursed manually in salesforce and upload the expense receipt manually in Salesforce.

Responsibilities :

- Download Receipts in Salesforce from Expensify.
- From Expensify if status of reports changed then it also changes value of fields in salesforce.
- Update status of expense from salesforce.
- Developed Apex Triggers.

4. Project : Auto-populate value in fields of new records using API Call

Description : In this project we developed custom new record page and when we are creating a new record then values in some fields are auto-populated with the help of API response.

Responsibilities :

- Used the Aura framework and Salesforce lightning Design System (SLDS).
- Developed VF pages as per requirement.
