Salesforce Developer Intern / Projects, Feb – 2022

Project Management App

Description: This is a Project Management Application. Using this application,   a company can manage the lifecycle of their Projects; they can create Client and Project records and maintain the relationship   between them. The project manager has the authorityto create new Requirements   and assign tasks to the employees. Project manager can track the progress of the Project and tasks allocated to the employee. The release object can be used to send a mail to the manager and the client to inform them about the release of the new feature or project.

BookYourShow: Ticket Booking App

Description: This is a ticket booking application for various concerts held at various venues. When an individual book a ticket he needs to pay the price according to the availability, like if the availability is less than 10% of total tickets price rise by 10% for premier concerts. Each individual can see all his part a future tickets and past tickets and can provide feedbacks about past concerts.

Society Management App

- Description: This is a Residential Society Management Application. Using this application the society management staff can create new Members and track their Maintenance records. The maintenance object keeps a track of the members who have paid the maintenance amount and which members have their maintenance amount due. Staff can also send mail to the Members reminding them to paythe societymaintenance fee. On receivingthe amount, an acknowledgement messageis sent to the member. Security guards can use the visitor objectto enter data ofall theVisitors that pay a visit to the members of the Society in a day and maintain all thedetails such as relationship with the member, contact details, and reason for the visit.
