EXPERIENCE

PWC, Bangalore — Senior Associate

July 2022 - Nov 2023

Tools: JIRA, POSTMAN, Guidewire Policy Center

Project 1:

Worked on Guidewire Policy center which is an underwriting and Policy administration system and used in Personal and Casualty insurance. In PC, information related to policy is stored and the system will determine the price of the transaction. This pricing information will be sent to the billing system.

Accenture, Bangalore — Application Development Analyst

Feb 2021 - July 2022

Tools: Rally, MS SQL, Guidewire Policy Center

Project 2:

Worked on Guidewire Policy center which is an underwriting and Policy administration system and used in Personal and Casualty insurance. In PC, information related to policy is stored and the system will determine the price of the transaction. This pricing information will be sent to the billing system.

Project 3:

Objective is to provide an Online service for the employers to view the claims at any time. Users can view the claim details, Claim History and can upload the necessary documents. We will be performing accessibility testing using Non visual Desktop Access tool(NVDA).

LTI, Chennai — *Quality Engineer*

June 2017 - Feb 2021

Tools: HP-ALM, SoapUI, Rally, TravTest, MS SQL

Project 4:

One Main Finance is a system which provides personal loans. A personal loan from OneMain offers fixed rates and fixed payments. The rate and product you qualify for depends on various factors including loan size, term length, credit history, income, expenses, other financial obligations, and the availability of collateral.

Project 5:

Project Benchmark Facade is a modernisation project. Creating Restful web services to connect a predictive modeling tool called Benchmark tool with different other systems. Facade is the final URI which will contain all other services. Here we test 13 different Micro services in 3 different environments with 8 different markets. Benchmark facade is a modernisation project, which involved in Creating new Rest API to interact with different legacy systems. Benchmark facade project has testing scope for Web Service, GUI and Database validations. Main course of my project is to replace the existing communication between multi systems with the web service technology called Restful web service.
