## PROFESSIONAL SUMMARY

Worked as a **Scrum Master** for a product development team and currently working on implementing scrum for a Designers team for multiple projects on the Banking domain. I have earlier worked with multiple clients in the US, UK and Middle East. I have also worked as **Scrum Master** on **SAFe Agile framework** project and leading a scrum team on the **Oracle Retail** applications.

- **3+ years of experience as Scrum Master.**
- Total 15+ years of technical and functional experience in **requirements gathering, analysis, solution design, development, customization projects, upgrade projects, system functional testing and maintenance.**
- Worked in projects based on **SAFe Agile framework** and earlier on **Agile and waterfall models.** Worked with Product Owner in scrum activities like **Program Increment Planning, Backlog Review and Refinement and Grooming.**
- As a Scrum Master facilitated Scrum events like **Sprint Planning, Daily Scrum, Review and Retrospective.**
- Used **DevOps for continuous integration and deployment using Git and Jenkins.**
- Led and mentored a team of 5 to 10 members on techno-functional aspects.
- Project Management Activities: Data collection and status reporting, release planning and management.

---
