Work Experience

Scanify-Dev, Remote — *Android Head Engineer*

February 2022 - May 2022

- As an android head, I worked along-side other engineers and developers working on different layers of the infrastructure to develop, test and deploy efficient software.
- I used Asana, Figma, Github, Slack for effective team work and Zoom for weekly stand ups.
- Implemented and deployed an android based championship app using tools such as Apollo Graphql, coroutine flow, MVVM Architecture, AndroidX, and Dagger Hilt.

Bayoku Technology, Enugu, Nigeria — *Django/Android Developer*

June 2021 - December 2021

- Designed and implemented a school management system for easy recording, tracking and management of school resources.
- Got to use tools like Github, Postgresql database, Room database, Kotlin serializations, Firebase database, just to name a few.

Qubangel LTD, Remote — *Android Developer*

October 2020 - January 2021

- Developed a platform for downloading and publishing of mobile applications, especially apps that can not be found on google play store, tools used are Rest API services, Android download manager among others.

Google Developers Scholarship GADS, Remote — *Android Developer Team Lead*

April 2020 - December 2020

- Guided a team of five to build and deploy an android app to help solve educational challenges in Africa.
- Best top 100 project for Gads 2020 program - Gads 2020
