- Perform ad-hoc analysis that helps in understanding business and performance trends
- Worked on the development of Dashboard Reports for the Key Performance Indicators for top management
- Involved in creating Data Blending in case of merging different sources
- Hands-on development assisting users in creating and modifying worksheets and data visualization dashboards
- Involved in creating a Dual-Axis bar chart with multiple measures
- Ability to Extract and Load Data direction from different source systems like flat files, Excel and SQL Server
- Prepare timely weekly / monthly / quarterly deliverable reports
- Querying using SQL statements to view database tables
- Design, Develop and Maintain data sources, data visualizations and dashboards using Tableau Desktop
- Performed performance tuning of the dashboard in Tableau desktop.
- Published the developed dashboards into production and ensured the data was up to date by scheduling extract refreshes.
- Perform production readiness audit of tableau applications developed by the users
- Weekly Testing on proposed project changes.

<b>Project # 2</b>
Project Name: Investment Banking
Technology Use: Tableau Desktop, Tableau Server, Sql, Excel.
Duration: Sept-2021 to Nov-2022

### Roles & Responsibilities:

- Daily/Weekly involving in calls with customer and discussing about status and new requirements of the project.

- As per the business requirements Designing the Dashboards
- Analyzing reporting requirements.
- Developed various Reports, Dashboard.
- Experience in creating various views in Tableau.(Bar Chart ,Dual Axis, Map)
- Experience in creating Filters, quick filters, table calculations, calculated measures and parameters.

<b>Project # 3</b>
Project Name: Inventory Analysis & Management
Technology Use: Tableau Desktop, Tableau Server, Oracle
Duration: Nov-2020 to Sept-2021

#### **Roles & Responsibilities:**

- Involved in data modelling changes according to the business requirements.
- Enhance to the Dashboard and Reports.
- Experience with different Sheets like Pivot Table, Line, and Bar chart.
- Applied various types of filters like Data source filters, Quick filters and Context Filters.
- Created table calculations, calculated fields and parameters.
- Implemented all Functions like Aggregate Functions, String Functions, and Date Functions.
- Deployed in application in Tableau Server.

<b>Project # 4</b>
Project Name: Medical Sales Analysis
Technology Use: Tableau Desktop, Tableau Server, Sql
Duration: Sept-2019 to Oct-2020

#### **Roles & Responsibilities:**

- Understanding the functional, technical requirement and documents
- Created and external data from multiple data sources using data blending concept.  
Involved in creating and visualizing dashboard using tableau desktop
- Developed various dashboards, used different types of Filters, Parameters while dealing with huge volume of data.
- Involved in creating calculated field, Table Calculations, Actions, Sets, Field based Sorting etc.
- Created/ Developed different types of Visualizations like Bar Chart, Line Chart, Bump Graph, Scatter Plot, Cross Tab Report.
- Used Date Function, String Function Logical Functions and Table Calculations
- Published the reports on tableau server, content management
- Created functional documents for the project slides for presenting them in Ad-Hoc meetings.

<b>Project # 5</b>
Project Name: One Time Delivery Dashboard, Sales Delivery Dashboard

Technology Use: Tableau Desktop, Tableau Server, Sql
Duration: Oct-2018 to Sept-2019

### **Roles & Responsibilities:**
