**SALESFORCE  
CERTIFIED**

Platform Developer I

### **Experience Summary:**

Having approximately 5 years of experience as salesforce Developer. I have extensive experience as CRM Administrator and developer with focus on SaaS (Software as a Service) development and SFDC (Salesforce.Com). During this tenure I was involved in various stages of software development life cycle including – Requirement Gathering, Analysis, Design, Development, Coding, Implementation and Testing of various systems. I am proficient in Object Oriented Analysis and Design (OOAD) and possesses very good understanding of the Salesforce.Com Object Model architecture. In my recent few assignments, I have led the team supporting the operations of highly critical applications. A brief overview of his skill sets is mentioned below:

- Have extensive hands on 4 years of experience in Classic.
- Have extensive hands on 1 year of experience in LWC (**Lightning Web Component**).
- Has extensive experience in Salesforce Data Migration using Data Loader.
- Has worked with an Agile, Scrum methodology to ensure delivery of high-quality work in dynamic environment.
- Requirement Analysis, Design and Development.
- End-to-end development of Customized force.com and Salesforce based Applications.
- Played the role of Application Manager in Service Operations for multiple Salesforce based Applications.
- Designed Flows, Process Builder, Workflows, Triggers, Custom Formula Fields, Field Dependencies, validation Rules, Workflows, and Approval Processes for automated alerts, field updates, HTML email templates, Marketing templates, and Email generation according to application requirements.
- Implemented Security and sharing rules at object, field and record level for different users at different levels of organization. Also created various profiles and configured the permission based on the organizational hierarchy.

### **Certifications**
