- C/C++

INTERNSHIPS

Vedansh Solutions LLP

(January 2020 - March 2020)

- Built a user friendly, interactive online education portal EQUAL SHIKSHA using ASP.NET for students to enhance their learning experience.
- Used C# to implement the framework and SQL database to maintain the record of data.
- Created modules for admin and the end user of the website while providing all the necessary functionalities.

PROJECT WORK

Stock Splitter App

- Developed a web app that calculates the share split on the basis of investment amount and the percentages of income that the user wants to invest in the available stock options from NIFTY50.
- Used python along with flask api for the back-end.
- Implemented the front-end part involving components and business logic using React.

Emotion Recognition using Facial Expressions

- Developed a real time employee assessment system which analyses employee emotions over a given period of time.
- Utilized Microsoft Azure Face apis for emotion recognition and aggregated results over a given duration.
- Used Java and Eclipse.

EXTRA CURRICULAR

- Active participation in tech fests.
- Coordinated with all the departments involved in the organization of cultural events at college.
- Attended hackathons and webinars.
