PROJECT 1#

Client : Porter

Project : Partner onboarding and setup

Role : Salesforce Developer

Description:

Porter is an on-demand logistics marketplace offering its customers trucks and tempos for their intra-city pick-up and delivery needs in India. While the B2C segment makes up 80% of Porter's business, it also offers last-mile delivery to large businesses like Big Basket, Amazon, and ITC, among others. We have streamlined the driver onboarding process to simplify it, and with Sales Cloud, have cut this down to 45 minutes. Porter is also using Service Cloud within its contact center case management and resolution. All tickets raised through the customer and partner app are routed to Service Cloud for faster resolution. The solution offers email-to-case routing and is integrated with the voice channel as well. This omni-channel ticket management solution has helped vastly improve caseresolution times.

Responsibilities:

- Involved in backlog sessions and sprint planning sessions
- Involved in the setup of the application, standard objects, custom objects and processes
- Involved in Setting up Users, roles, profiles and Security settings
- Developed Apex Trigger logic on various objects for implementation of business logic
- Worked on Validation rules, Workflow rules, Email Notifications and Case Assignment rules during initial phase of the project
- Designed Approval Process for lifecycle request (Operator onboard) and automated using Process Builder
- Creation of Batch apex to process Bulk of data
- Created Lightning Components, added CSS and Design Parameters that makes the Lightning component look and feel better
- Implemented Scheduled and Batch Class for handling data inserted from Legacy system into Salesforce
- Created Reports and Dashboards
- Designed Service cloud to resolve customer problems using email- to-case, web-to-case and voice channels
- Involved in Deployments, technical assistance and end-user troubleshooting for bug fixes, enhancements

PROJECT 2#

Title **Sales1st**
Client **Shell**
Role **Developer & Administrator**

Description:

The Project Sales1st is to Support the Shell, to improve the Sales and Maintain the Updated Customer Information in the Application. The Project involved Designing and Developing the Different Modules Like Account, Contact, Deal, Discussion Note based on the Business Requirements. There are Currently Close 700+ Active Users Across the Globe using the Application.

Responsibilities:
