SUMMARY

- Over **10 years** of IT experience in all phases of Software Development Life Cycle and development of enterprise web based multi-tier applications/architectures using Java/J2EE technologies.
- Extensive development experience in object-oriented analysis, design and programming thought complete SDLC in various model like **Waterfall** and **Agile**.
- Strong programming/development skills using **Java, J2EE along-with Spring Boot , spring MVC, Microservices , RESTful web services**.
- Strong experience in **React js, Redux, EXT js, Javascript, Html**
- Experience in **AWS**.
- Strong experience in **SQL**.
- Strong experience in **Jenkins, SONAR** and **GIT**.
- Strong experience in **Splunk, Kibana**.
- Complete Understanding and hands on experience in **Agile** development methodologies
- Thorough knowledge and work experience in **Banking, Educational & Telecommunication** domains.

SKILL SETS

- | | |
|--------------------------|--|
| • Front End | React js, Ext js, Javascript, |
| • Backend | Java, Spring MVC, Spring Boot , Microservices |
| • Application/Web Server | Apache Tomcat |
| • IDE | Eclipse, VS code |
| • Database | MySQL, MongoDB |
| • Tools and Utilities | Maven, Git, Sonar, Jenkins, Splunk, JIRA, Kibana |

EMPLOYMENT HISTORY

- **May 2013** to till date - Working as Senior Developer for **Cognizant Technology Solutions**.

EXPERIENCE

Project 1: Automated Customer Support Service for Verizon, Apr 2019 to till Date
Leading 8 members team.

Technologies/ Skills used: React js, Spring boot, Micro services, Java 7/8, REST Web services, Spring MVC, JavaScript, EXT JS, Sonar, Maven, Eclipse, Web Sphere Application Server.

Description: Verizon is an American telecommunications company which offers wireless products and services. It is a wholly owned subsidiary of Verizon Communications. Verizon Wireless is the second largest wireless telecommunications provider in US.

NSA Migration:

- Developing the front end React JS Application with the Redux Saga Middleware state management which will be used by the customer care representative to provide the support service for the customers. Will interact with the multiple Middleware applications to get the customer data based on different constraints.
- Followed the React with spring boot Microservice Architecture.

Legacy Application:

- Analyzed the requirements to define business process and workflow for each of the use cases.
- Interact with the business users for requirement gathering and clarifications.
- Mentor the junior developers to help them understand the functionality of the application and help them complete their modules.
- Knowledge sharing through training sessions for Technology Stack required for development.
- Participating in daily scrum call.

Project 2: Scopus for Elsevier, US

Duration: Jan 2018 to Mar 2019

Technologies/ Skills used: Java 7/8, REST Web services, Spring Boot, Spring MVC, Sonar, Maven, Eclipse, Tomcat, AWS.

Description: Scopus is the largest abstract and citation database of peer-reviewed literature and quality web sources with smart tools to track analyze and visualize research. Scopus offers access to 15,000 peer-reviewed journals from more than 4,000 international publishers. In development for more than four years with more than 500 librarians and researchers, Scopus is designed to bring the user expert results even if he is not an expert researcher.

Responsibilities:

- Analyzed the requirements to define business process and workflow for each of the use cases.

- Interact with the business users for requirement gathering and clarifications.
- Mentor the junior developers to help them understand the functionality of the application and help them complete their modules.
- Knowledge sharing through training sessions for Technology Stack required for development.
- Participating in daily scrum call.
- To review code and ensures deliverables of very high quality.

Project 3 : NGWI Migration for Intuit, US

Duration: Oct 2013 to Dec 2017

Technologies/ Skills used: Java7, REST Web services, spring, JUnit, Maven 2.0, Eclipse, Tomcat, MySQL, Git, JavaScript, HTML, Splunk etc.

Description:

Script Engineering Team in Intuit develops and maintains the screen scraping scripts, which is used to scrape the websites of financial institution to aggregate the data for Customer central. My team responsible for enabling new banks across the region for QuickBooks. Activity involved developing screen scraping scripts for banks across world by understanding bank layout, understanding REST calls

Responsibilities:

- Analyzed the requirements to define business process and workflow for each of the use cases.
- Interact with the business users for requirement gathering and clarifications.
- Mentor the junior developers to help them understand the functionality of the application and help them complete their modules.
- Knowledge sharing through training sessions for Technology Stack required for development.
- To review code and ensures deliverables of very high quality.
- .

EDUCATION Detail

- **B.E Electronics and Communication**, from BSA Crescent Engineering College (Chennai-48), affiliated Anna University Chennai (2012) with **First Class**.
- **DECE** from The Karur Polytechnic College Karur with **First Class**.
- **HSE** from Rani Meyyammai Higher Secondary School (Dindigul) with **First Class**.
- **SSLC** from Govt High School(R.Vellode – Dindigul) with **First Class**
