Syndication Portal

April 2021

Syndication Portal is built to show the data related to Syndicators, they are like investors in MCA industry. They used to lend the money on a deal and then get pay back when Merchant Pays. To cover all their need we have created 3 tabs. We are providing filters on all the 3 tabs if they want to see the specific things.

1. Syndications: In this tab we are showing all the deals in which they have participated, showing what's the status of the deal and outstanding balance.

2. Payouts: This tab will show all their payouts happened on each day, this payout comprises of multiple payments from multiple deal. We are showing the breakdown of the Payout in a popup.

3. Custom Reporting: In this tab they can Filter the payments as per their requirement, we have given filters for the Debit/Credits and dates on which payments are settled.

Technologies: PHP, Salesforce APEX, SOQL.
