

Mayuri Thakur

Front-End Developer with industry experience in building websites and web applications. Specialise in HTML5, CSS, JavaScript and have professional experience working with Java and PL/SQL.

EXPERIENCE

Star Tv Networks – The Walt Disney Company, Mumbai — Senior Executive

April 2019 - Present

Project - OneView Dashboards and MINT Foundation

- Developed smart dashboards that provide real time data on revenue and viewership using recharts.js library. These Dashboards provide recommendations and have predictive indicators. MINT Foundation is focused on the sales team of Disney to handle their ad-sales business for entertainment channels.
- Built reusable components using React for future use.
- Used Redux library for managing application state and Axios library for fetching data from the server.
- Optimized application for maximum speed and scalability.
- Collaborating with UX Designers, Product Managers and other team members to meet desired functionality.

Oracle Financial Services Software Ltd, Mumbai, — Staff Consultant

Oct 2017 - March 2019

Project - Tax Transparent Share Class Application TTSCA

- Designed and Developed new user facing features using React, Redux and customized cloud UI Framework.
- Enhanced the existing UI that improved web functionality and responsiveness. Implementing stored procedures.

— Associate Consultant

March 2014 - Sept 2017

Project - Global Tax System GTS

- Designed Database and implemented stored procedures in PL/SQL. Developed visual elements that users see and interact within a web application.

Freelancing Project - Client HalalBox

- Halalbox is an online Fresh Meat delivery application.
- Developed UI for Desktop Mode single handedly using React, Redux library.
- URL of site developed: <https://www.halalbox.in/>
