KN-Risk provide service to the customer to verify all the shipping details and provide risk assessment involved in shipment of goods during Point of discharge to point of loading. | |

| | | |
|-------------------|---|-----------|
| Project Name | Service Integration Investment | |
| Company Name | Capgemini India Pvt Ltd | |
| Client | Kuehne Nagel | |
| Role | Developer | |
| Roles performed | <ul style="list-style-type: none"> Understanding functional and design requirements at technical level. Involved in design and development. Preparing Unit Test cases and involved developer level testing. Responsible to implement the respective backend code. Taken the responsibility of implementing the full flow of assigned task. | |
| Technologies used | Spring Boot | Hibernate |
| | My SQL | Servlet |
| | JSP | JQuery |
| | Ajax | Tomcat |
| Description | Synfioo is an external provider of ETA predictions for road and sea transports. To evaluate the quality of predictions an Evaluation Tool is implemented, which compares transport data from SALOG with ETA predictions by Synfioo. Data from SALOG includes basic transport information, actual arrival and departure times as well as manual predictions, if present. Besides, Log Index data is integrated to further compare data quality. The evaluation tool is able to import transport information from SALOG and Log Index as csv or json file. For retrieving Log Index data another tool (LIESL) is used (see below). The evaluation tool is deployed on AWS and a batch job is querying Synfioo API every hour. | |

From: Aug
2014
To Sept 2017

| | | |
|----------------------------|---|------------|
| Company Name | Saksoft Ltd | |
| Project Name | Credit Report, Credit Score, Credit Alert | |
| Client | TransUnion | |
| Role | Consultant | |
| Roles performed | <ul style="list-style-type: none"> ✓ Build and deployed application using JDeveloper and Web logic Application server. ✓ Used web services for communication between separate layers of code ✓ Used Ant and maven to manage the build, testing, and deployment processes. ✓ Creation and maintenance of data using Oracle database. ✓ Used Jira and Bugzilla for tracking and resolving issue. | |
| Technology used in project | Core Java | Spring MVC |
| | Web Services | XML |
| | Hibernate | |
| Description | <p>Like CIBEL in India, In USA every citizen is given a unique social security number (SSN) which track all his personal, financial, criminal and all social activity, in short every record of an individual.</p> <p>This whole record is maintained by a bureau called Transunion for whom we are working. So, monitoring each individual we provide report & score for them on the basis of which they can apply for loan from bank and much more.</p> | |
