Technology Used	<ul style="list-style-type: none"> <li>• Python(4 Years)</li> <li>• Django, REST-API</li> <li>• Ajax, Javascript</li> <li>• AWS</li> <li>• CI-CD</li> <li>• Microservice</li> </ul>	5 Years
Configuration Management Tools Used	<ul style="list-style-type: none"> <li>• Git-Hub,git,Postman,Jira-tool,MODHeader</li> </ul>	5 Years

## **PROJECT 1:**

### **Projects Undertaken at Tekoptimize Software**

#### **Product Description:**

As the goal of the application is ease of use and to provide an interactive interface, extensive research has been done to gain an insight into the needs and behaviour's of various users. The working of the application is made convenient and easy to use for the end user. The users should be able to view the complete specification of the product and various images at different Zoom levels. The user should be able to read the customer reviews for the product and the ratings provided. They should be able to write their own reviews. They should be able to print out the specifications for a product or email the product page to a friends etc.

I am worked on **The Health Wellness.**

Project Module	Order Module	Duration- From Jan 2020
Team Size Platform Technology	22 Ubuntu. Python (Django, REST-API), JSON,AWS.	
Data Base	MySQL.	
Description	Purpose of this module is provide all functionally related to customer This module starts when the user visits the home page or when a user searches for A product by entering a search term. This part of the application includes displaying all the products that are available or the products that match the search term entered by the user. The user can then filter these products based on various parameters like size, product type, colour supported or a price range etc. The user browse through the products and each product would be displayed with an image and its features. A user can add a product to the cart either by dragging the product and dropping it in the cart or by clicking a button. The user would be able to see the shopping cart summary.	
Responsibilities	Requirement Understanding, Coding and Unit Testing.	

Role	Senior Software Engineer.
------	---------------------------

## **PROJECT 2:**

### **Product Description:**

I am working for the development of a Complaint Management System (CMS) and Housing Allocation System. The CMS will aid the users in raising complaints on the portal through a ticket wherein the admin will assign the complaint ticket to the resolver. The resolver will be able to resolve the issue, submit the details of the resolution and request for stock of material from the admin user. The housing allocation system will allow the users to apply for housing block by filling an online registration form. The form will follow an approval process and once approved the NN officer will allot the house to the applicant based on the availability of the house/block.

### **Projects Undertaken at Globallogic**

I am worked on **Complaint Management System (CMS) & House Allocation Management System.**

Module Name	Complaint Management System (CMS)	Duration- From May 2021
Team Size	7	
Platform	Windows/NT/2000/XP.	
Technology	Python,(Django, REST-API), JSON, HTML, JavaScript,AJAX,JQuery	
Data Bases	MySQL.	
Description	This module deals with Form captures nature of complaint and description about complaint. The ticket will be generated on submission of the form and notification will go to the admin & customer via email and system notification Email & System generated notifications on ticket generation and resolution of complain Submit feedback on resolver and give ratings From Email link Resolver will be able View the Respected Complain OR By logged in to system resolver will be able to View the list of all the assigned complains by the Admin.	
Responsibility	Requirement Understanding, Client Communication, Coding and Unit Testing and Assisting other member.	
Role	Software Engineer.	

## **PROJECT 3:**

### **Projects Undertaken at Infogain PVT Limited**

I am worked on **Officer Work.**

Project Module	Off Duty Management Module	Duration- From May 2022
Team Size Platform Technology	18 UBUNTU/20.4 Python (Django, REST-API), JSON,AWS.	
Data Base	MySQL.	
Description	OfficerWork® is the industry-leading proprietary scheduling software solution for law enforcement that streamlines off-duty processes and provides accountability utilizing web and mobile applications. It's organized on a platform that connects your agency with its officers and customers. Secure Cloud-based Scheduling Software Free Agency & Officer Use Configurable to Support Agency Policies Data Continually Backed Up & Protected Off Duty Management is dedicated to supporting and protecting law enforcement agencies, their officers, and community businesses by offering a fully customizable, centrally administered no-cost solution that manages all aspects of off-duty programs and keeps agencies in full control mitigating risk and liability.	
Responsibilities	Requirement Understanding, Coding and Unit Testing.	
Role	Software Engineer.	

#### **Interests:**

- Programming and Learning Innovative Technologies.

#### **Spoken Languages:**

- Hindi, English, Marathi,Telugu.

**Academic Qualification:**

Course	University/Institution	Result	Year
	G.H Raisonni,Pune		
B.TECH.	G.H Raisonni,Pune	60%	2017
Intermediate	Narayana High School, Hyderabad	83%	2013
High School	Nandulkar School,Yavatmal	75%	2010

**Personal Details:**

Date of Birth	9 <sup>th</sup> March 1995
Father's Name	Shrinivas Gore
Marital Status	Unmarried.
Nationalism	Indian
Hobby	Troubleshooting of various types of analytical problems including Mathematics, Mechanics, Computer Programs & Puzzles. Listening to Music, and Reading Books.
