Python

Playwright

PERSONAL PROJECTS

Crypto Lending

- It connects lenders to borrowers in a P2P Defi manner, where borrower provides crypto collateral to get a loan, and the outcome(borrower-defaulted, borrower-repaid, dispute) is being governed by a smart contract deployed on ethereum blockchain.

Project Management Tool (Front-End)

- Visibility of active projects.
- Members working in a project. Search an employee using name or phone.
- Switch between online and offline project members. Sorting on Table params. Deployed using Heroku.
