## Education

- **Master of Computer Applications – 2013**  
National Institute of Technology (N.I.T.), Kurukshetra – **CGPA 9.3**
- **Bachelor of Computer Applications – 2010**  
Panjab University (P.U.), Chandigarh – **Percentage 72.04%**

## Technical Skills

<b>Programming Languages</b>	Apex, C, SOQL, SOSL, PL/SQL, Scripting
<b>SFDC Technologies &amp; Tools</b>	Apex Classes & Triggers, Salesforce Lightning, Lightning Component Framework (Lightning Web Components and Aura Components), Lightning App Builder, Lightning Flow (Process Builder and Flow Builder), Visualforce Pages, SOQL, SOSL, SFDX, Data Loader, Workbench, Salesforce DX, Change Set
<b>Web Technologies</b>	HTML, JavaScript, CSS
<b>Database</b>	MySQL
<b>Operating Systems</b>	Windows, Linux
<b>Other Frameworks &amp; Tools</b>	VS Code, Eclipse, Jenkins, SVN, GIT

## Project Experience

<b>Project Name</b>	NewNet Mobile Messaging
<b>Organization</b>	Aricent Technologies (Holdings) Ltd.
<b>Role</b>	Software Engineer
<b>Technology</b>	C, Linux, MySQL, Percona SQL, GIT
<b>Abstract</b>	The NewNet Mobile Messaging SMS Network offers a new approach for Short Message Service. NewNet Mobile Messaging solution is based on “SMS Network” concept. It is a product suite

	of core network and application message routing and mobile network querying products. SMS Network concept is a modular messaging solution designed to overcome all the obstacles of legacy SMS infrastructures and allow operators to deploy new advanced messaging services.
<b>Contribution</b>	<ul style="list-style-type: none"> <li>- Bug fixing and maintenance related to the LGP module.</li> <li>- Analyzing the feature related to the PBC module of the NMM component.</li> <li>- Database handling and research regarding more optimize solution for database handling and storage using MySQL and Percona SQL along with InnoDB and TokuDB storage engine.</li> </ul>

<b>Project Name</b>	Flexi Zone Micro LTE BTS
<b>Organization</b>	Aricent Technologies (Holdings) Ltd.
<b>Role</b>	Software Engineer
<b>Technology</b>	C, Linux, Yocto, SVN, Scripting, Jenkins
<b>Abstract</b>	The Flexi Zone Micro LTE BTS is 4th generation small cell BTS optimized for an outdoor micro cell environment. The Project involved the opportunity to develop Platform Software for multi core DSP sub-system existing on DAN SoC, a multicore architecture-based hardware platform.
<b>Contribution</b>	<ul style="list-style-type: none"> <li>- Compilation and integration of BSP.</li> <li>- Resolving kernel and non-kernal vulnerabilities.</li> <li>- Development and maintenance of CC&amp;S (Common Computer and Support SW) and HWAPI.</li> <li>- Developing CI (Continuous Integration), including complete automation of UT and SCT for LFS, CC&amp;S and HWAPI in Jenkins (CI tool).</li> <li>- Applying NSN modifications to U-Boot, SSH and bug fixing related to board support packages.</li> </ul>

<b>Project Name</b>	3G RNC Development and Maintenance Support
<b>Organization</b>	Aricent Technologies (Holdings) Ltd.
<b>Role</b>	Software Engineer Trainee
<b>Technology</b>	C, Linux, Scripting, Jenkins
<b>Abstract</b>	Radio Network Controller is a governing element in UTRAN and is responsible for controlling the Node B's that are connected to it.
<b>Contribution</b>	<ul style="list-style-type: none"> <li>- Developed CI (Continuous Integration), including complete automation of Build, UT and SCT for SA3-PRB of RNC in Jenkins</li> <li>- Working for the Control Plane, provided the maintenance and support for RNC products like cRNC, mcRNC and ADA for SA3-PRB.</li> </ul>
