Sales Force integration with FinnOne

.Client - Bajaj Fiserve Lending

- Finn-One CAS is part of Finn-One lending system (ranked as the best-selling lending solution in the global banking industry), allowing the organisations to service applications faster and with minimum rework to ensure intelligent risk and credit management without any scope for human error.
- Used Salesforce as dealer front-end system for origination and integration of the two systems.
- Develop custom middleware module for allowing the master data configuration the of two system and fields to be synced in real time.

Mini Branch- Finn-One

Client- Bajaj Finserve Lending

- FinnOne has concept of branches in system. However, Bajaj wanted to have further geographical hierarchy in the system, for better operational efficiency and control. This hierarchy was further used for delinquency management.
- Branches were further broken down into Clusters (called as mini branch). Clusters had multiple areas. Each areas was having many pin code
- Bajaj also want to maintain data for these new Masters using .xls upload and download the report for MIS

Lines in Finn-One

Client- SBI Bank of India

- SBI wanted new product lines in consumer lending. Support for Loans against Deposits and Bonds, IPO Funding, Loans against lease rentals, Home loan takeover, Loans for IPO and various types of rural financing were added in the system.
- Handled loan again deposits creation on new scheme, workflow, screen changes for capturing details, eligibility changes, new letters and reports .
- Worked on very aggressive timeline completed successfully on time.
