Sakha Potekar

SKILLS

Hard Skill:
· C# Programming
· ASP.Net MVC, ASP.Net core, LINQ, ADO.net
· HTML, CSS, JavaScript
· ReactJS, knockoutJS
· Sql Server DB

Programming Languages:
· C#
· Python
· JavaScript

Tools and Software:
· Visual Studio
· SQL server MS
· GIT, GitHub, TFS
· TeamCity, Octopus
· RabbitMQ
· JIRA

EDUCATION

Bachelor of Engineering
(B.E.) Information Technology (2013)
Nagpur University (MH, India)

Diploma in Engineering
Information Technology (2009)
MSBTE (MH, India)

Career Objective

To obtain a challenging position in your organization where I can apply my experience, knowledge, and skills, thus effectively contributing to the success of the company and become a key contributer.

- Responsible for Security certificate updating and maintenance
- Database access management and incidence management.

Software / Special Tools: Service now, CyberArk, DR Portal, JIRA, EY Audit portal.

Client: HCA portals (HealthCare)
February 2019 to October 2019(Syntel Pvt. Ltd)
Technical lead/Developer, Full-time

This project includes migration from NHibernet to entity framework and replacing all MVC controllers with ASP.net web API, this system is already built and running using ASP.net MVC and NHibernet. But due to business requirements and to improve availability and maintainability of system it's required to migrate. Application developed using Asp.Net MVC, framework 4.5 and many other tools and components used like C#, ADO.NET, MS SQL Server, WCF.

Responsibilities:
- Participating in business meeting for requirement's understanding and discussion.
- Migrating NHibernet code to equivalent Entity framework code.
- Replace each Asp.net MVC controllers with ASP.net Web API controllers.
- Having daily meetings with client.

Technology Stack: C#.Net, Asp.net MVC, Web API, SQL Server 2014, TFS
Software / Special Tools: Microsoft Visual Studio 2017, TFS, PostMan.

Client: Claims Status Inquiry Humana (HealthCare)
          March 2018 to January 2019(Syntel Pvt. Ltd)
          Software Developer, Full-time

This Application is a WCF Service which is design and developed to provide claims status. It takes 276 Xml request for claims status as input and provides 277 Xml response as output it includes validating input request and input field required for retrieving claims status information i.e claim number, provider NPI etc. this service further calls different services to collect claims detail, after receiving responses from other service it formats the response as per standers and send it back to calling service. Application developed using .Net framework 4.5 and many other tools and languages used like C#, ADO.NET, IBM DB2, Web Services, WCF.

Responsibilities:
- Involved in the Analyzing requirements of the project.
- Participating in business meeting for requirement's understanding and discussion.
- Developing application logic and implementing requirements using C#.
- Having daily meetings with client.
- Providing weekly updates on every sprint closing meeting.
- Conduct unit testing.
- Providing support for deployment turns, SIT and UAT testing.

Technical Environment: C#.Net, WCF, IBM DB2
Software / Special Tools: Microsoft Visual Studio 2017, TFS, SOAP UI

Client: GESE (Global Electronic System Editor), Whirlpool of India
          December 2015 – December 2018
           Global Software Developer, Full-time

GESE (Global Electronic System Editor) is an application design and developed for Whirlpool Corporation, this tool is used to edit the setting file i.e the .eep file graphically. It has four section Machine config, ACU config, HMI config and Cycle section these are used to set the behavior of appliance at machine level and ACU level, using GESE the firmware engineers are able to set the different cycles for appliance like washer, dryers etc. each user can also save their configuration file on centralized database. This tool is going to be used globally for Whirlpool Corporation.

Responsibilities:
- Developing application logic using C#.
- Involved in the Analyzing requirements of the project.
- Managing plans on RTC and handling the sprints.
- Participating in global meeting for requirement's understanding and discussion.
- Created Database components and writing stored procedures.
- Generating results and Updating database using LINQ and entity framework.
- Unit testing and defect handling.

Technical Environment: C#.Net, Win form.
 Software / Special Tools: Microsoft Visual Studio 2012, SQL server 2012, IBM RTC.
