About Me

Enthusiastic Full Stack Developer with avid hands-on experience designing, developing and implementing applications and solutions using MERN stack technologies. Seeking to leverage broad development experience and hands-on technical expertise to be in a challenging role as a full Stack Engineer.

Front End Skills

- Javascript ES5/ES6
- React-JS 15/16
- Redux / Context API
- Nightwatch-js / Cucumber
- Jest / Enzyme Unit testing
- Bootstrap4
- HTML5 / CSS3

Back End Skills

- Node-js
- Express-js / NPM
- GraphQL
- Linux Administration
- PL/SQL, OracleDB
- MOngoDB
- NGINX

Cloud AWS

- EC2, IAM, S3
- Elastic cache / RDS

Education

B'Tech in Electronics Communication Engineering

2012 – 2016 **CMR Engineering College** Hyderabad
Percentage - 83%

Awards

- 2012 – 2016 **Gold Medal in Academics**
For 2 consecutive years In Engineering on being College Top-per, Received Scholarship for the Same
- 2020 **Employee spot-light Award**
By Verizon during last quarter of 2020 for proposing and executing Scrubit POC to enable sensitive data masking for off-shore users.
- 2020 – 2021 **Star performer of iteration**
By Verizon Multiple times. For my accountability and adhering to deliver zero post delivery defect code everytime.

Working Experience

- currently **Engineer II Fullstack** Hyderabad
Working as a Full stack developer for Verizon Data Services India Pvt Ltd
- 2018 – 2019 **Programmer Analyst** Hyderabad
Web and Hybrid mobile application developer at Cognizant Technology Solutions. Worked for Metlife client
- 2016 – 2018 **Systems Engineer** Bangalore
Full stack developer at Tata Consultancy Services, Worked for Common-Wealth Bank of Australia

Projects At Work

React-js, GraphQL, Node-js, oracleDB, PL/SQL, Jenkins

Vendor Portal Management

Verizon hires external vendors to perform Maintenance activities at Verizon owned cell sites frequently, where vendor site engineers during inspection identifies issues, logs reading and raise a purchase order request to verizon if any repair identified.

This complete manual process starting from vendor quoting for inspection, vz shortlisting the bid, inspection and billing process is automated using vendor management portal.

Contribution

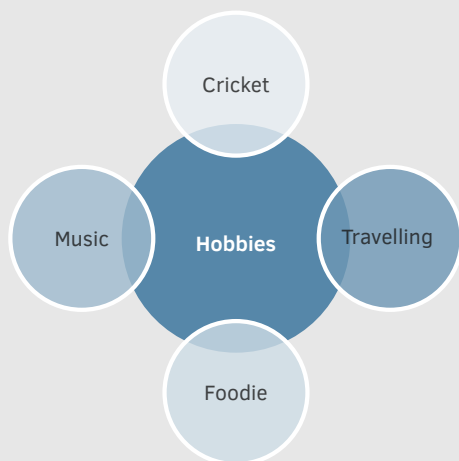

- Involved in every phase project from initial design when it was initially started as POC.
- Worked closely with Product Owner to understand business requirement behind every deliverable, and providing most optimized solution.
- Created several Rest apis using node and graphql to support business functionality.
- Along with feature completion, every deliverable has been Unit tested using Jest/Enzyme and provided automation using cucumber and Nightwatch-js Worked closely with functional testing partners to ensure zero post production defects.
- Involved in production deployment along with onshore SME.

React-js,
Remix,
Redux,
coredova,
JSON store

Metlife Mexico sales app

An application developed with an intent to facilitate Metlife - a leading insurance provider in USA and its insurance agents with below features.

- Suggest customers with different policies available
- Create quotation by collecting information of customer, which includes health & risk data, using which monthly premium is calculated.
- Post which user personal information is taken and stored in local datastore.

Contribution

Analysing business requirement, coding & Unit testing to ensure Zero defect delivery.

MERN,
Heroku

Virtual Knowledge Transfer bootcamp

Any fresher onboarded in the project, has to undergo initial KT phase, which involves lot of effort from him and as well from the critical team players in the project additional to their project deliverables. If there exists a proper documentation in the form of a mandatory bootcamp would help them reduce number of hours spent in grooming. Virtual KT bootcamp was developed with the same intent

Contribution

- Presented a POC and received business approval.
- Designed and Developed Interactive UI using ReactJS and robust yet stable backend rest apis using Node and MongoDB., deployed to heroku.

Freelance Contribution

<https://craft-galaxy-srujanakshanthala.herokuapp.com/>

React,
Redux

Craft-Galaxy

An Ecommerce application to purchase home made crafts, Along with all pre-requisite ecommerce functionalities, payment gateway is also enabled using paypal sandbox account. Developed to enhance my skills in React 16 and learning modern practices of code using express and mongo middle-ware

<http://bio-beverages.herokuapp.com>

React,
Redux

Bio-Beverages App

An application developed to enhance associates in an organisation to order their beverage online and let them know the status of the processing of their order. As backend was not used, a time delay has been introduced to change the order queue at regular interval.

React,
Redux

Git Hub Profile finder

Intent is to develop an efficient web app through which we would be able to fetch Profiles and Repos of various users available over Github. Client server communication was enabled by using latest features of JavaScript which includes Promises / Async / Await.
