## WORK EXPERIENCE

Salesforce Automation Tester – Selenium/Salesforce Admin Accenture | Aug 2019 -Present

- Prepared test scripts using Selenium WebDriver automation.
- Involvement in Automation Infrastructure development using selenium.
- Enhanced Test cases using java programming features and TestNg Annotations.
- Developed/Maintained Web Driver wrapper methods to implement POM framework.
- Execution of selenium test cases and reporting defects.
- Perform regression testing and report the bugs. Used Java programming features to enhance the test cases and optimize the code.
- Performed both single test runs and batch test executions of selenium scripts for this application.
- Generating Test Execution Reports using Selenium Features like Extent reports, Excel read write methods (Apache POI). Execution of automated smoke test suite and regression test suite in different testing environments (Prod, Pre Prod, QA).
- Published html test reports and shared with client. I was responsible for updating the codes to the server using open source controlling software (GIT).
- I was responsible for giving KT for other team members.
- Preparation of Selenium WebDriver Configuration Material.
- Customizing Lightning Apps and List Views in Salesforce Org.
- Creating Custom Buttons and Links in Salesforce Org.
- Creating Global Quick Actions and Object-Specific Quick Actions in Salesforce
- Mobile App.
- Customizing Compacts Layouts and Navigation in Salesforce Mobile App.
- Creating report with the Report Builder in Salesforce. Visualizing reports with the Lightning Dashboard Builder in Salesforce.
-

Application Development Analyst Accenture | Sept  
2017 -Aug 2019

- Worked as Sprint Tester for every release.
  - Involved in Test Design activities such as writing plan.
  - Analysing requirements and creating Testing scenarios. Performed
  - many high priority ad-hoc test scenarios as requested by the clients.
  - Involved in Manual Functional testing, UAT testing, Regression testing and SIT.
  - Involved in EPIC Workflow Integration testing.
  - Execution of Tests and Reporting Defects in JIRA. Interact with
  - Developers and Business Analysts to perform various types of
  - testing throughout Software Testing Life Cycle (STLC) and Bug Life Cycle (BLC).
- Worked on a SCRUM for 1year with complete team of
- programmers, third party vendors and offshore team. Perform sanity test on every build and regression tests on every modified build.
  - Responsible for GUI and Functional Testing.
  -
