## Project-2

Oman ESW/ICMS System	
Role	Developer
Database	Oracle
Platform	Java, Spring IOC, Spring MVC, Spring-Boot, Hibernate, JSP, Junit, Maven, Oracle10g, Eclipse
Team Size	8
Duration	June 2018 to May 2019
Description	This application provides an online serviced to import and export the goods. This system is using 2 schemas, 1 for ESW and 1 for ICMS. Information exists in both ESW and ICMS, so there is a need to update both schemas. Customers will use ESW for importing or exporting the goods and ICMS will be used by Custom or other OGA to approve the importation or exportation. The modules in this system are Declaration, Manifest, Payment, Warehouse Inspection, Risk, Tariff, Cargo Release, System Admin, Investigation, Trading Partner Registration, etc.

---
