SKILLS

Sales Cloud	Marketing Cloud
Lightning Web Component	Lightning Component
Apex	SOQL
Salesforce Admin	JavaScript
API	Triggers

PROJECTS

- Recruitment App**
 - Created highly customized lightning components to perform advanced searching on the Salesforce database.
 - Implement custom logic for OCR integration on upload file on the lightning component and parse it using API to store it as a text in Salesforce.
 - Handled commission calculation & candidate assignments.
 - This application helps to manage complete candidates hiring journey which increased their productivity by 30%.
- LWC Component to Generate PDF In Opportunity Object**
 - Created a LWC component to Generate a PDF while saving an opportunity record.
 - User can save the additional information about opportunity in pdf format.
 - Pdf can be saved in notes & attachment section of the opportunity object.
 - Images, Rich Text and Links can also be added in the PDF.
- GoogleSheet Integration with Salesforce**
 - The business requirement was to provide a solution where the user can store their appointment and customer data into google sheets and to avoid storage issues in salesforce.
 - Worked on the integration of salesforce with Google Sheets, so that all the data can be sent to Google sheet with just one click and also allowing to clear the sheets by just one button click.
 - This helped with the storage issue and prevented the loss of the data.

CERTIFICATES

Platform Developer 1 (03/2021 - Present)
