PROJECT (3)

Domain: Pharma and Healthcare

Client: Cardinal Health

Project: HPA-CHE-PJ-ADV-REPORTING

Team Size:10

Role: Senior Qlik Developer

Description:

Cardinal Health, Inc. is an American multinational health care services company, and the 14th highest revenue generating company in the United States.

Responsibilities:

- Understand the Business Logic and collected the requirements or technical specification document or LLD from the team lead after creation of POC and meeting up with Clients/Users.
- By following AGILE methodology, we started our project where the entire document was divided into multiple SPRINTS and we developed our documents in each SPRINTS.
- Involved in daily SCRUM meeting held by Scrum-master and discussed about the pre & future area of project. Also involved with CLIENT during SPRINT review and retrospective or if any escalation came, I was fully involved to translate the solution.
- We followed 3-tier architecture for this Qlik project and migrated the project into Qlik sense also, where first the first two layers (Extraction & Business Layer) were in Qlikview and we showed presentation layer in Qlik Sense.
- Involved myself in removing data modelling issues and created various charts in Qlikview and Qlik sense.
- After successful completion of application, we made unit-testing and published the application into a designated stream.
- Also worked in Storytelling in Qlik **sense** and experienced in working in multiple area of Qlik Sense like Master-Items, Drill-down, color-coding etc.

PROJECT (2):

Domain: Consumer Product Goods (CPG)

Client: Anheuser Busch (AB-InBev)

Project: CGO-ANH-PJ-ANALYTICS

Team Size: 8

Role: Qlik Developer

Description:

Anheuser-Busch Companies, an American brewing company headquartered in St. Louis, Missouri.

Responsibilities:

- Core member of Migration Team, which involves Migration of QlikView reports from Qlikview11.2 to QlikView 12.2 Nov 2017 Version further worked on unit testing of reports and preparation of test case document.
- Fixed various types of issue like graphic issue, data issue, tuning issues, bookmark issues, syntax errors in migrated report.
- We followed AGILE methodology in which the product Backlog is divided into multiple sprints.
- Understand the Business Logic and gathered requirements in the form of LLD and then implemented our project by following 3-tier Architecture.
- Involved in data modelling, removing its issues like synthetic keys.
