## PROJECTS

---

### ❖ **Salesforce Service and Sales cloud Implementation**

The project required implementing Sales Cloud from the scratch and enabling the lead, opportunity and campaign management processes.

The project required implementing Service Cloud from the scratch and enabling the cases, web chat and Email to Case management processes.

### ❖ **Salesforce CPQ Project**

CPQ is an application that fits between the ERP and CRM systems – increasingly as a native component of the CRM.

### ❖ **Einstein Chat Bots**

Einstein bot emphasis on assisting people and answering the same straightforward questions over and over again, leaving customer service reps more time to help customers with more complex questions or problems. It is designed to discover insights, predicts outcomes, recommends actions and automates tasks.

Omnichannel is a multichannel approach to sales that seeks to provide customers with a seamless shopping experience, whether they're shopping online from a desktop or mobile device, by telephone.

### ❖ **Community Cloud and Health Cloud Project**

This project using salesforce lightning and make public URL based Health website.

### ❖ **Live server API based Project**

This project using salesforce lightning and create connection between third party app and concurrent way data transfer org to third party app using Live Server API.
