## Work Experience

### Software Engineer

NLB Services

12/2022 - Present

Developed SSIS package to transmit data from source SQL table to the destination SQL table. Developed SQL jobs to transmit data from staging tables to the main tables. Managed the database and worked with jobs and performance tuning. Handled missing values, formatting, and transformations using SSIS. Written stored procedures in SQL Server to prepare reporting tables. Created and scheduled jobs to run the SSIS package. Wrote and debugged stored procedures, views, and user-defined functions. Migrated data (import & export) from Text to SQL Server through SSIS. Used joins and CTEs to simplify complex queries involving multiple tables and established relationships between tables using Primary Key & Foreign Key Constraints.
