Completed 12th Standard from Delhi Public School, Patna with **81.20%**

■ X (CBSE BOARD)

2010 - 2011

Completed 10th Standard from Delhi Public School, Patna with **10 CGPA**

Job Responsibilities :

- Involved primarily in all activities such as Content migration, customization of UI platform (InfoCenter), Patch activity, upgrade of OKM components to ensure data integrity.
- Requirement gathering and Weekly discussion with US clients for sprint planning and grooming for smooth flow of project.
- Improving user experience by continuous monitoring and bug fixing in the application along with ensuring its high availability.
- Team handling and mentoring of trainees for the growth of team and delivering best services to client.

Key Achievements :

- Created **multiple APIs** in the AnswerFlow application using **Spring MVC** to provide various data to client for their third party apps as per the requirement.
- Enhanced the current analytic module of the tool by adding functionality like **View Count** of document including user information.
- Implemented additional functionality of '**Did You Mean**' on the custom search bar. Enhanced the indexing of search results.
- Implemented Custom Authenticator & Configuration of **SSO** using **SAML 2.0** easing up the web application access for end users which was a major blocker for the client.
- Customized and modified the code of multiple JSP pages to support **Java 8**.
- Worked in shifting the entire environment to different Data Center. This included heavy **shell scripting** to change parameters in different files and customized JSPs.
- Written various **shell scripts** to retrieve the data from heavy files which was not provided by the tool and written other scripts used for **monitoring and alert generation** for application which improved application reliability.
- **Localization** of the web application for Arabic locale to enhance and improve user experience for the users of different countries.
