WORK EXPERIENCE

Software Engineer - Tableau Developer

HSBC - Global Private Banking - Global Client Reporting

03/2019 - Present

Pune, India

Achievements/Tasks

- Developed Tableau visualizations and dashboards using Tableau Desktop for Client Reporting Project (BFSI Domain) that shows the performance of various assets within portfolios of HNWI globally. Worked with key stakeholders to determine requirements for new dashboards.
- Have a good understanding of dashboard designing and development, connecting various data sources. Was involved in end-to-end implementation and enhancements of the dashboard from requirements gathering to deployments of dashboards based on Key Performance Indicators.
- Possess effective communication skills with the ability to communicate with both technical and non-technical audiences. Good time management skills to meet project deadlines and manage project priorities.

Software Engineer - Test Analyst

HSBC - Global Private Banking - Global Credit Module

09/2016 - 02/2019

Pune, India

Achievements/Tasks

- Executed test cases via Tosca automation & also tested the web application manually which is related to BFSI domain. Conducted post-release/implementation testing. Familiar with Agile Methodologies and SDLC.
- Reported timely defects in JIRA. Hands-on experience in test planning, defect validation, sending status reports.
- Worked with cross-functional teams to ensure quality throughout the SDLC. Executed batches via Control-M to ensure proper data is available for testing. Helped users in functional testing in higher environments.

IT Support Engineer

Mphasis Limited - BMS

12/2015 - 08/2016

Pune, India

Achievements/Tasks

- Providing assistance, information and support to clients.
- Solving IT-related problems and client issues via remote assistance, phone, email, or chat. Installation of software & tools via VPN, helping in troubleshooting technical issues, making follow-ups & scheduled callbacks whenever necessary.
