## Professional Experience

### Project #1

**Project Name** : Cloud Marketplace (Web application)  
**client** : One Advanced  
**Environment** : Angular, Python, Serverless and AWS few services  
**Description** : Cloud Marketplace is a one step solution for buyers and suppliers to buy and sell the products respectively. We made this product for bigger Organizations and institutions to buy the raw and furnished and suppliers can supply the products in bulk to buyers. We are providing an amazing platform for suppliers to sell their products.

### Project #2

**Project Name** : My Workplace (Web application)  
**client** : One Advanced  
**Environment** : Javascript and Node.Js  
**Description** : My workplace is a store to access all the applications which are used in a corporate life to handle employee related activities like financial , human resources, skill development, desk booking, leave management and so on. But every feature is accessible by role based authorisation inside the system. My workplace consists of multiple organizations and workplaces.

### Project #3

**Project Name** : ForevaCorp (Hybrid Mobile App)  
**client** : Crowd Communications Technology Private Limited  
**Environment** : Angular Framework, Ionic Framework , Python, Flask and Firebase.  
**Description** : forEvaCorp is the world's only by-invitation safe networks and groups. At forEvaCorp, we envision a world that celebrates the uniqueness of its special traits, interests, concerns, ways of thinking and interacting. You can now host your own branded, private Zone within forEvaCorp for free, or, for a per-user-license, create your very own exclusive branded app.

### Project #4

**Project Name** : Aptacare (Hybrid Mobile App and Web Application)  
**client** : Aptacare Ayurveda  
**Environment** : Angular Framework, Ionic Framework, Node JS and Firebase.

**Description** : Aptacare is an end to end Digital mobile and web Platform designed to assist patients and Doctors to communicate with each other online. This offers different types of consultations to get proper prescription for diseases and managing patients and doctors schedules, meetings, prescriptions and delivering medicines to the doorstep.

## Project #5

**Project Name** : Farmeasy (Hybrid Mobile App)

**client** : Wellnest Organic Farms

**Environment** : Angular Framework, Ionic Framework, React JS, Node JS and Firebase.

**Description** : FarmEasy is an end to end Digital mobile Platform designed to assist farmers in farm management. In the current farming scenario, communication is the need of the hour in order to be efficient in farming and there is a huge gap between the actual ground reality and the solutions in the market to address this problem. FarmEasy is an attempt to solve the problems faced by a common man in the farming industry.

## Project #6

**Project Name** : shopthepost(Hybrid Mobile App and Web Application)

**client** : vstack

**Environment** : Angular Framework, Ionic Framework, Python, Flask ,Node JS, Firebase and MongoDB.

**Description** : Shop the post is the combination of social media platform and ecommerce platform where the influencers post the model posts attached with the products which are used on that posts, users can order the products from that post. Same behavior implemented in both web application and mobile application.
