Professional Summary

- Having 9 years of experience in the field of IT explicit in React JS, SPFX, O365, SharePoint Online, MS Azure, DevOps, MS Dynamic(Power app, Power Automate), .Net Applications (Asp .Net, MVC, WCF services, Web API), SQL, JavaScript, jQuery including specialist in Building Long Term Relationships & Identifying Improvement Opportunities that Drive Efficiency, Quality & Productivity.
- Experience in working with Azure Function apps, logic apps, App services, Apps Registrations, Virtual Machine, Search services and Storage Accounts.
- Client Engagement - Developing a solid and trusting relationship between key clients and company.
- Resolving key client issues and complaints
- Developing a complete understanding of key account needs
- Anticipating key account changes and improvements
- Managing communications between key clients and internal teams
- Business requirement gathering, analysis.
- Strategic planning to improve client results.
- Collaborating with different teams like pre-sales, creative design, and development members to ensure the highest quality of deliveries are being produced and all client needs met.
- Planning and presenting reports on account progress, weekly and monthly initiatives to share with team members, stakeholders, and use in future case studies or company training.
- Meeting client needs and deliverables according to proposed timelines.
- Analyzing client data to provide customer relationship management.
- Demonstrating innovative ideas, products to different stakeholders.

Skill set:

Database	MS-SQL Server 2008 R2, 2012, 2016
Languages	C#, jQuery, Java Script, Typescript, SQL
Framework	MS Azure, React JS, ASP .Net, MVC, Web API, WCF, SPFX, SharePoint 2013(On- premises), SharePoint online, Entity framework, CI/CD pipeline, Seek, MS Dynamics, Powerapp, Power Automate.
Platform	Visual studio (2013- 2017), Visual studio code
Source Control	SVC, DevOps (TFS, Git), Docker
Migration tools	PowerShell, Share gate tool, Metalogics

Project details:

Project Title	Shell SiteWise
Environment	React JS, Redux, Hooks, MS SQL 2019, ArcGis Map, Azure function app, Material UI, Web API, Figma, Azure DevOps.
Precise	A project which will track location and activities of on-site users at site who are having blackline devices. That device continuously triggers signals which will read by web api that signal can be gas detection, emergency situation, hurts and falls at site.
Responsibility	<ul style="list-style-type: none">● Took the responsibility as tech lead and researched on many features and implemented in our project.● Developed functionality and screens as per requirement.● Code, performance optimization.● Developed new ways of functionality such that application can be user friendly.● Reviewing and assigning tasks to the team.

Project Title	Return to Workplace management
Environment	React JS, SPFX, SharePoint Online, Power automates, Azure app service, Azure app registrations, Power apps, Azure search service, Xamarin
Precise	workplace management created for employees to return to the office in pandemic situations following with Covid19 rules and regulation and keeping social distancing in office.
Responsibility	<ul style="list-style-type: none">● Took the responsibility as tech lead and researched on many features and implemented in our project.● Developed functionality and screens as per requirement.● Code, performance optimization.● Developed new ways of functionality such that applications can be user friendly.● Reviewing and assigning tasks to the team.

Project Title	Senet (Intranet)
Environment	O365, SPFx, React JS, Azure web jobs, .Net, Seek, Weather API, Microsoft Graph, Azure blob storage,
Precise	Organization management portal which consists of news, articles, CEO talk, providing summary of offshore incidents, files management (images, documents, videos), search management in the whole organization (News, articles, sites, documents (including content in it), videos etc. and providing more features.
Responsibility	<ul style="list-style-type: none"> • Developed functionality and screens as per requirement. • Code, performance optimization. • Developed new ways of functionality such that applications can be user friendly. • Interacting with third party clients and developing applications which can be synchronized with their application.

Project Title	AFE
Environment	React JS, SPFX, SharePoint Online, remote event receiver, Azure app service, Azure app registrations, Azure function apps.
Precise	A financial application for businesses to approve their budget for specific drilling locations based on multiple chains of approval with remainder email functionality and delegation.
Responsibility	<ul style="list-style-type: none"> • Developed functionality and screens as per requirement. • Code, performance optimization. • Developed new ways of functionality such that applications can be user friendly. • Interacting with third party clients and developing applications which can be synchronized with their application.

Project Title	One Arvind
Environment	O365, SPFx, Azure web jobs, .Net, Azure SQL DB

Precise	An application for textile company portal management includes admin, accounts and accessing their basic application via it like HR service, PF, Loan etc.
Responsibility	<ul style="list-style-type: none"> ● Developed functionality and screens as per requirement. ● Code, performance optimization. ● Developed new ways of functionality such that applications can be user friendly. ● Interacting with third party clients and developing applications which can be synchronized with their application.

Project Title	Police Bureau
Environment	O365, PowerApps, Power Automate, SharePoint online
Precise	A UK police department wants to track their request and raise through an application where the request will go through a different level of approval process to complete the request.
Responsibility	<ul style="list-style-type: none"> ● Developed functionality and screens as per requirement. ● Code, performance optimization. ● Developed new ways of functionality such that applications can be user friendly. ● Interacting with third party client and developing applications which can be synchronize with their application.

Project Title	Balance sheet Commentaries
Environment	O365, PowerApps, Power Automate, SharePoint online
Precise	A finance application where different countries and companies will have discussion and task assigning to other stackers for approving and changing amounts of product.
Responsibility	<ul style="list-style-type: none"> ● Developed functionality and screens as per requirement. ● Code, performance optimization.

	<ul style="list-style-type: none"> ● Developed new ways of functionality such that applications can be user friendly. ● Interacting with third party clients and developing applications which can be synchronized with their application.
--	--

Project Title	PPE (Personal protective equipment)
Environment	O365, PowerApps, Power Automate, SharePoint online
Precise	Application created for onshore rig users to their safety and requesting new equipment.
Responsibility	<ul style="list-style-type: none"> ● Developed functionality and screens as per requirement. ● Code, performance optimization. ● Developed new ways of functionality such that applications can be user friendly. ● Interacting with third party clients and developing applications which can be synchronized with their application.

Project Title	Travel Request
Environment	O365, PowerApps, Power Automate, SharePoint online
Precise	A portal that helps customers to manage their travel requests and details.
Responsibility	<ul style="list-style-type: none"> ● Developed functionality and screens as per requirement. ● Code, performance optimization. ● Developed new ways of functionality such that applications can be user friendly. ● Interacting with third party clients and developing applications which can be synchronized with their application.

Project Title	ICS
Environment	O365, PowerApps, Power Automate, SharePoint online
Precise	This application helps businesses to understand risks in the industry of digital security and architecture.
Responsibility	<ul style="list-style-type: none"> ● Developed functionality and screens as per requirement. ● Code, performance optimization. ● Developed new ways of functionality such that applications can be user friendly. ● Interacting with third party clients and developing applications which can be synchronized with their application.

Project Title	IRT
Environment	O365, PowerApps, Power Automate, SharePoint online
Precise	For transferring equipment from one rig to another rig based on request and approval chain.
Responsibility	<ul style="list-style-type: none"> ● Developed functionality and screens as per requirement. ● Code, performance optimization. ● Developed new ways of functionality such that applications can be user friendly. ● Interacting with third party clients and developing applications which can be synchronized with their application.

Project Title	New Teams
Environment	O365, PowerApps, Power Automate, Azure AD, MS Graph API, SharePoint Online
Precise	For handling multiple new teams requests automated based on approval process and archiving.
Responsibility	<ul style="list-style-type: none"> ● Developed functionality and screens as per requirement.

	<ul style="list-style-type: none"> ● Code, performance optimization. ● Developed new ways of functionality such that applications can be user friendly. ● Interacting with third party clients and developing applications which can be synchronized with their application.
--	---

Project Title	Vendor management
Environment	O365, PowerApps, Power Automate, SharePoint Online
Precise	An app created for managing and handling contracts of different vendors also licensing processes.
Responsibility	<ul style="list-style-type: none"> ● Developed functionality and screens as per requirement. ● Code, performance optimization. ● Developed new ways of functionality such that applications can be user friendly. ● Interacting with third party clients and developing applications which can be synchronized with their application.

Project Title	Digitize solution
Environment	O365, PowerApps, Power Automate, SharePoint Online
Precise	A solution created for managing, updating project design and architect documents on a centralized system.
Responsibility	<ul style="list-style-type: none"> ● Developed functionality and screens as per requirement. ● Code, performance optimization. ● Developed new ways of functionality such that applications can be user friendly. ● Interacting with third party clients and developing applications which can be synchronized with their application.

Project Title	Automation Permission
Environment	O365, PowerApps, Power Automate, SharePoint Online
Precise	An application for making default SharePoint site access request automate based on approval chains and granting permission
Responsibility	<ul style="list-style-type: none"> ● Developed functionality and screens as per requirement. ● Code, performance optimization. ● Developed new ways of functionality such that applications can be user friendly. ● Interacting with third party clients and developing applications which can be synchronized with their application.

Project Title	Enterprise Search
Environment	O365, Web API, C#, Azure DB, Local DB, SharePoint online
Precise	An application for searching documents/files from local systems, One-drive, SharePoint, and outlook emails and merging solutions into intranet portals.
Responsibility	<ul style="list-style-type: none"> ● Developed functionality and screens as per requirement. ● Code, performance optimization. ● Developed new ways of functionality such that applications can be user friendly. ● Interacting with third party clients and developing applications which can be synchronized with their application.

Project Title	Travel Settlement
Environment	O365, SPFx, .Net, Azure SQL DB, SharePoint online, Azure web jobs
Precise	Application where business user can do claim their travel expense to company where tickets were booked to third party tool

Responsibility	<ul style="list-style-type: none"> Responsible for Analysis development, administrator configuration, interacting with clients understands the requirement. Providing direct support & development, involving all phases of software development life cycle (SDLC) for development functions related to large complex applications, giving technical support to the team, part of requirement gathering.
-----------------------	---

Project Title	DTR
Environment	O365, provided hosted app, .Net, Azure SQL DB, SharePoint online
Precise	An application created for textile companies to track their sponsor amount spent on every month for marketing and payment details.
Responsibility	<ul style="list-style-type: none"> Responsible for Analysis development, administrator configuration, interacting with clients understands the requirement. Providing direct support & development, involving all phases of software development life cycle (SDLC) for development functions related to large complex applications, giving technical support to the team, part of requirement gathering.

Project Title	Aviation Training
Environment	SharePoint 2013, SQL SERVER 12, Ajax, JavaScript, jQuery, CAML query, ECMAScript, REST API, SharePoint Designer.
Precise	The Project based on aviation employee training with schedule period and performance on daily basis with their feedback provided against trainer and training.
Responsibility	<ul style="list-style-type: none"> Responsible for Analysis development, administrator configuration, interacting with clients understands the requirement. Providing direct support & development, involving all phases of software development life cycle (SDLC) for development functions related to large complex applications

Project Title	Ulive
Environment	SharePoint 2013, C#.Net 4.5, SQL SERVER 2010/12, Ajax, JavaScript, LINQ, jQuery, CAML query, ECMAScript, REST API, WCF
Precise	The Project based on intranet portal developed for company internal activities like Classified, Cab booking, RNR etc.

Responsibility	<ul style="list-style-type: none"> Responsible for Analysis development, administrator configuration, interacting with clients understands the requirement. Providing direct support & development, involving all phases of software development life cycle (SDLC) for development functions related to large complex applications
-----------------------	---

Project Title	Islamic site (Ahle-Hadith)
Environment	SharePoint 2013, C#.Net 4.5, SQL SERVER 2010/12, Ajax, JavaScript, LINQ, jQuery, CAML query, ECMAScript, REST API, WCF
Precise	The Project related to Quran and Hades providing online authenticated information with references. This project has different modules like Akbar Aslaf, Quran, Hades, Fiqh, Scholar videos, Matrimonial etc.
Responsibility	<ul style="list-style-type: none"> As per programmer analyst, analyze the given requirement and implement/code, design, testing and database design on a project with a team that also follows the deadline and responsibility to deploy the project. Providing direct support & development of software applications/tools, involving all phases of software development life cycle (SDLC) for development functions related to large complex applications & software programs pertaining to web applications.

Project Title	KBM Game
Environment	SharePoint 2013, C#.Net 4.5, SQL SERVER 12, Ajax, JavaScript, jQuery, CAML query, ECMAScript, REST API, WCF
Precise	This game project is related to the Quran and has information related to quiz games. This game is just like KBC. KBM questions are based on basic Islamic knowledge, seerat Rasool (SAW) etc. This project is a multilingual project in Arabic, English, Hindi, and Urdu.
Responsibility	<ul style="list-style-type: none"> Analysis the given requirement and implement/code, design, testing and database design on project with the team also follow the deadline and responsibility to deploy the project.

Project Title	Islamic Search Engine (web based)
Environment	C#.Net, ASP.Net, SQL SERVER 2012.
Precise	This Search Engine is web based. It allows searching in the Quran, Hades, Fiqh, and Tafseer of the Quran. SEO allows searching in multilingual languages like English, Hindi, Urdu and Roman. It automatically detects user input language and displays the result in user language. It also supports for phonetic search

Responsibility	<ul style="list-style-type: none"> ● Analysis the given requirement and implement/code, design, testing and database design on project with the team also follow the deadline and responsibility to deploy project.
-----------------------	--

Project Title	E-Franchise
Environment	C#.Net, MVC, ASP.NET 4.0, EDM, SQL SERVER 2008, Ajax, JavaScript, LINQ
Precise	The Project has different Modules like Inventory, Advertisement, Purchase, Excise, Warehousing, HR & Payroll, Accounting, marketing and Job Work etc.
Responsibility	<ul style="list-style-type: none"> ● As per programmer analyst, analyze the given requirement and implement/code, design, testing and database design on a project with a team that also follows the deadline and responsibility to deploy the project.

Project Title	E-Exam & Demo
Environment	C#.Net, MVC, ASP.NET 4.0, ADO.Net, SQL SERVER 2008, Ajax, JavaScript, LINQ.
Precise	<p>The Project designed for student online exams. Before taking their online exams, release an online demo for student practice and understanding the pattern of online exam questions. This exam was based on the basics of computer knowledge, MS office, DTP and tally which is included in the syllabus. Web Based ERP online exam is an objective type question.</p> <p>The project further includes registration and online results which are based on grades and displaying ranks.</p>
Responsibility	<ul style="list-style-type: none"> ● As per programmer analyst, analyze the given requirement and implement/code, design, testing and database design on a project with a team that also follows the deadline and responsibility to deploy the project.

Project Title	Inward/Outward System
Environment	C#.Net, WPF, SQL SERVER 2008, ERP, Crystal report, LINQ.
Precise	The Project has different module admin, new applicant, end user, report, store, account, HR department. This is based on company inward, outward, company franchises record, and resources provided, student application forms, printing record and advertisement details etc. Project includes printing appointment letter, call letter by system giving candidate information

Responsibility	<ul style="list-style-type: none"> As per programmer analyst, analyze the given requirement and implement/code, design, testing and database design on a project with a team that also follows the deadline and responsibility to deploy the project.
-----------------------	--

Project Title	Medical
Environment	C#.Net, ASP.NET 4.0, ADO.Net, Ajax, SQL SERVER 2008, JavaScript, Crystal report.
Precise	<p>This Project is a Medical Portal for providing details of medical to distributors, agencies, and medical stores in the medical field. This project has different modules like purchase, sale, Bill, stock detail, payment reminder and reports etc.</p> <p>Control Panel for Admin offers facilities like providing users rights, low stock reminder and due dates of agencies, daily sale and purchase log, profit, margin etc. Includes alerts to end users about stock and payment.</p>
Responsibility	<ul style="list-style-type: none"> Understand analysis of the given requirement and implement the requirement.

Project Title	EHMS
Environment	C#.Net, ASP.NET 4.0, ADO.Net, SQL SERVER 2008, JavaScript, Crystal report.
Precise	<p>This project for Hospitality management and multi user interface. Admin set the privileges to each for all departments and look at daily activity.</p> <p>Project also includes many types of reports and modules for different departments.</p>
Responsibility	<ul style="list-style-type: none"> Understand analysis of the given requirement and implement the requirement.

Project Title	E-Pathology
Environment	C#.Net, ASP.NET 4.0, SQL SERVER 2008, Ajax, JavaScript, Crystal report.
Precise	<p>This Project is based on Pathology requirement for patient test and reports. The Project has different Modules like admin, different Test, and report etc. Project has test customization package creation. The project has different reports like test conducted patient details daily, weekly etc. It's a multi user application with rights for each user.</p>
Responsibility	<ul style="list-style-type: none"> Understand analysis of the given requirement and implement the requirement.

Project Title	Event, Advertisement and Management
Environment	C#.Net, WPF, ERP, SQL SERVER 2008, Crystal report.
Precise	This Project is based on client requirements for event and advertising management. Project is a completely EPR and multi user interface application which manages the client's department like collecting client requirements, needs, criteria and fees. This project helps to give advertisement and pamphlet distribution on date area and no of quantities.
Responsibility	<ul style="list-style-type: none"> ● Understand, analysis the given requirement and implement the requirement

Project Title	E-School
Environment	C#.Net, WPF, SQL SERVER 2008/12, ERP, LINQ, Crystal report.
Precise	<p>This Project is based on the Education domain, the main aim of this project is to provide papers with less work, fast work and management using technology.</p> <p>Project based on new concepts for attendance like RFID attendance, BIOmetric. SMS alert service for daily student attendance, bus service and exam dates. This project is multi language, multi user, multi-tasking, ERP based, user friendly. to give advertisement and pamphlet distribution on date area and no of quantities.</p>
Responsibility	<ul style="list-style-type: none"> ● Development, analysis of customer requirement and achieve deadline

Carrier:

Organization	From Date	To Date	Role
PALMTREE TECHNOLOGIES PVT LTD, AURANGABAD	Jul 2011	Apr 2012	Trainee
SUNSOFT INFOWAY PVT LTD, AURANGABAD	Apr 2012	Apr 2013	Software Engineer
AZY RURAL INFO PVT LTD, AURANGABAD	Apr 2013	Apr 2014	Software Engineer

ISOFT SOLUTIONS, AURANGABAD	Apr 2014	Dec 2014	Software Engineer
ACUVATE PVT. LTD., HYDERABAD	Dec 2014	Present	Senior Software Engineer

Domain Knowledge:

- Oil & Gas
- Aviation
- Intranets
- E-Commerce
- Textile
- Mobility
- Medicine
- Education & Training
- HRM & Payroll

ACADEMIC:

Bachelor of Engineer (CSE) - 2011

Dr. Baba Saheb Ambedkar Marathwada University, Aurangabad

HIGHER SECONDARY – 2004

Pune Board

SENIOR SECONDARY – 2002

Pune Board
