## TECHNICAL LEAD - SALESFORCE

### EXPERIENCE

#### TECHNICAL LEAD – SALESFORCE

- Working closely with various tracks to ensure consistency of requirements and setting right expectations for the design.
- Gathering requirements; supporting client in determining the degree of automation and successive transformation to technical requirement; preparing requirement documents and technical design documents to meet the business rules.
- Working on fitment analysis for categorization of all requirements according to complexity and implementation feasibility in salesforce platform; administering effort estimation and scoping of business requirement
- Developing Proof of Concepts and designing prototypes for requirement and validation with the stakeholders for complex requirements.
- Code deployment using azure pipelines and preparing change and rollback plan with risk assessment.

#### SR. DEVELOPER – SALESFORCE

- Extensive experience in configuration and customizing solutions using various platform features like lightning components (lwc and aura), apex classes, triggers, batches , flows, process builders.
- Worked on sales cloud, service cloud and communities.
- Integrated salesforce with multiple applications using SOAP and REST api.
- Perform RCA for any issues identified during development lifecycle.
- Experience in deployment using changesets, gearset, git and CI/CD pipelines.
- Perform unit testing for the module assigned and take ownership of delivering the module with minimal functional and technical errors.
