Accenture Solution Pvt Ltd - Pune

Software Engineer

Nov-2016 to May-2018.

Project 3:-

Project Title	: -	nCino Santander Bank USA
Duration	:-	Mar-2017 to May - 2018
Team Size	: -	8
Role	: -	Developer
Operating System:	-	Windows 10
Environment	: -	Force.Com
Language Used	: -	Apex
Tools	: -	Eclipse Forc.Com IDE
Application	:-	nCino package.

Description:

Santander nCino is a nCino implementation for Santander's loan origination platform for its "Business Banking" segment, including the following sub-segments: Business Banking under \$150K (auto-decisioned), Streamlined Deals, Upper Business Banking and Full underwriting. Primary work is focused on integrating nCino with various legacy systems that customer has using web services. It also involves development of custom features like Credit approver selection, Aggregation calculations, Scorecard calculations, KYC processing and Customer search.

Responsibilities:

Working as salesforce developer, Responsible for requirement gathering from business users, all technical designs solution, code reviews and module deliveries with on high quality deliverables. Hands on development Visual force pages, lightning components, apex controllers, test classes, services layer classes, deployments activity and third party integration.

Project 4:-

Project Title	: -	RBCI
Duration	:-	Nov-2016 to Mar - 2017
Team Size	: -	5
Role	: -	Developer
Operating System:	-	Windows 10
Environment	: -	Force.Com
Language Used	: -	Apex

Description:

Org consolidation along with Sales and Service cloud implementation for Royal Bank of Canada (RBC). RBC has been using 3 different orgs which are not integrated with each other therefore have disjoint and fragmented data across all 3 orgs. This is hampering their business and agents to deal with sales and with servicing existing customers. RBC also wants to integrate with their existing Biztalk Server (which talks to other systems like MDM) with the Salesforce org.

Responsibilities:

Working as salesforce developer, Responsible for technical designs solution, code reviews and module deliveries with on high quality deliverables. Hands on development Visual force pages, apex controllers, test classes, services layer classes, deployments activity and third party integration.
