Professional Experience:

1. Project: ABB ADM QFA	
Client : ABB	Role : Application Development Analyst
Work Location: Off Shore (Hyderabad)	Duration: Feb 2017 to till now

Client/Project Description: ABB (ASEA Brown Boveri) is a Swedish-Swiss multinational corporation headquartered in Zürich, Switzerland, operating mainly in robotics and the power and automation technology. ABB and Accenture are joining forces to offer consulting, technology and business transformation solutions, which are based on their common understanding of customer needs and complementary skills. To manage ABB Sales functionality and Pricing, they installed Apttus CPQ and Apttus managed packages to process the Quotation life cycle management and Contract life cycle management.

Roles & Responsibilities:

- Involved in requirements gathering and analysis for "Quotation for Agreement" with the onsite team.
- Resolving Incidents.
- Involved technically and functionally in Quotation and Agreement life cycle management.
- Worked on Apttus x-Author for word plug-in to achieve the requirements of X-Author templates.
- Worked with Apttus team and involved in the cases raised with Apttus.
- Involved in client calls and actively supported the maintenance team in critical situations.
- Worked on Apttus managed package objects like Agreements, Quotations, Proposals, Templates etc to extend or modify the out of the box functionality given by Apttus.

2. Project: - Sanofi	
Client: Sanofi	Role: Application Development Associate
Work Location: Off Shore (Hyderabad)	Duration: April 2016 to Feb 2017

Client/Project Description:

Intelligent Patient Platform is salesforce service-based Application which is used to Provide service for the People who are suffering with different kinds of Illness, This Application mainly has few standard Roles like Nurse, Local Admin and Team Lead. Objects Used in this Application are Accounts, Personal Accounts, Cases, Activities and some of the Custom Objects. Intelligent patient platform application is B to B application where end users are the business users who will be using

the system for case management and creating accounts. Sanofi engages in the research and development, manufacturing and marketing of pharmaceutical. The company covers seven major therapeutic areas: cardiovascular, diabetes, internal medicine, oncology, thrombosis and vaccines. Their drugs(products) would be ordered for supply chain accounts or patients by the business users. They mainly focus on creating the cases for the patients. Hence here, Intelligent Patient Platform is considered as an application which implements patient services programs for providing services to the patients through account and case management.

Roles & Responsibilities:
- Worked closely in the design phase and done my part in providing the solution to every module involved in the project.
- Created workflow rules & Process builders as per the business need.
- Part of the team building huge Sales Console Application.
- Manage User roles, profiles, permission sets.
- Used my expertise for the creation of Administrative tasks like Creating Profiles, Roles, Users, Page Layouts, Permission Sets, Record types, Approvals, Activities and Sharing Model (Organizational Wide Defaults).
- Created Admin configurations such as Permission Sets, Queues, and Groups etc.
- Applied Coding Standards (code optimization) for the whole application.
- Worked on Test Classes and could achieve 85% test code coverage.
- Loaded lakhs of data into production using Data Loader Tool.
- Handling XML files for deployment using ANT.
