PROFESSIONAL SUMMARY

- A Dynamic professional with 3.5 years of experience as a Platform Experience Analyst with Software Quality Assurance experience. In the areas of Manual Testing, API Testing of Web based applications
- Experience to execute the test cases into Jira tool with Zephyr Squad and execute with cycle summary feature
- Experience into API and POSTMAN tools
- An active contribution in the design, review, testing, troubleshooting & debugging of the process, post-implementation, application maintenance and enhancement support to the client for the product / software application
- Actively involved and progressive with client designed guidelines and specification for testing the application
- Thorough understanding of the entire Software Development Life Cycle, Software Testing Life Cycle and Bug Life Cycle
- Experience in preparing Test Cases, Test Execution, analyzing defects and interacting with development team members in fixing the Defects.
- Hands on experience into the JIRA tool for Test cases execution and Bug logging
- Good understand of the RTM (forward and Backward) and Test plan documents
- Involved in Functional, Regression testing, Smoke testing, compatibility testing, Sanity testing and Defect reporting.
- Good knowledge into REST API Testing into SOAP UI and POSTMAN tool
- Good exposure into URI, HTTP, Headers, JSON and JSON path
- Experience to understand the Swagger and service documents for API Testing
- Basic exposure into the collections, API chaining and Newman command from POSTMAN
- Well versed experience into Collections and Data Driven Testing using POSTMAN
- Expertise into Agile methodology for SDLC and STLC implementation for project
- Work experience into the Agile scrum framework with sprint events
- Participated into the Planning, Review, Daily, Retro and Demo calls
- Hands on experience into the Environment and different levels of Testing
- Good knowledge on Database Testing using SQL for validate the data
- Characterized by both professional excellence and high-quality work performance, leading by example; people oriented, results-driven in effectively building, leading and motivating high performance teams to meet and usually exceed customer expectations.
- Worked in various environments presenting unique, high-pressure, high-visibility challenges that not only required intelligence, skills, experience and integrity, but demanding ways that required creativity, adaptability and flexibility.

EDUCATIONAL QUALIFICATIONS:

- Completed B-Tech from Avanthi Institute of Eng and Technology, Visakhapatnam

PROFFESIONAL EXPERIENCE:

- Working as a **QA Engineer** with **Digimetrix Technologies Pvt Ltd**, Bangalore from July 2019 to December 2022

AREA OF EXPERTISE:

Operating System	Windows Operating system
Tools	POSTMAN, Advanced Rest Client, and SOAP UI
Web Services Protocols	SOAP and REST
Methodologies	Agile and V-Model
Framework	Data Driven using POSTMAN
Databases	MYSQL, MSSQL, Oracle
Defect Tracking Tools	JIRA
Other Languages	JSON, XML, and SQL

PROJECT SUMMARY:

Project#1:

Project Name : FLK
Clients : Foot Locker
Role : Tester
Tools : REST, POSTMAN, JSON, JIRA, SQL, JSONPATH and Agile

Project Description: - Foot Locker Retail, Inc. is an American sportswear and footwear retailer, with its headquarters in Midtown Manhattan, New York City. Foot Locker Retail, Inc. was established September 12, 1974. The first Foot Locker opened in the Puente Hills Mall in City of Industry, California. In 1988, the F.W. Woolworth Company incorporated a separate company called the Woolworth Corporation in the state of New York.

Roles & Responsibilities:

- Understanding the business needs and requirements & analyzing the services document, experience to test REST services using Postman tool.
- Good knowledge on API Automation with SOAP UI tool
- Analyze the user stories and find the scope of API testing
- Understanding of swagger, Test plan and RTM documents for testing and tracking
- Execute the Test cases into JIRA tool and generate the Test reports
- Exposure and execute the APIs with postman tool and validate the same
- Hands on experience in HTTP Methods, URI, Pay Loads and Headers, Good exposure to HTTP Status codes.
- Enter the URI into POSTMAN tool, Select the HTTP Method and submit the request.
- Imported the collections into POSTMAN tool for perform the API testing
- Good experience in using collection variables , Global Variables and Environment variables
- Good exposure into Data Driven testing using POSTMAN tool with CSV file Test data
- Hands on experience to use different Headers and Parameters in POSTMAN.
- Basic exposure into the SOAP UI tool with Assertions, Properties and Property Transfer concepts
- Good experience to use Headers and Authorizations to Rest services in Postman
- Performing Regression, Functional Testing, Ad-hoc Testing and Smoke Testing
- Create logs to document testing phases and defects & Report bugs and errors to development teams.
- Experience in preparing the policies and quality documents for the improvement of the process.
- Tracking Defects and Select Test cases for Retesting & Regression Testing.
- Conduct post-release/ post-implementation testing & Work with cross-functional teams to ensure quality throughout the software development lifecycle.
- Work environment into the Agile scrum model and involved into each phase of SDLC and STLC
- Validating the data into Database by writing SQL Queries.
- Executed the regression suite to test the application stability for existing functionality.
- Expertise in Defect Tracking and Management Process using JIRA
- Good experience to use JSON payload and validate the same using third Json path tool.
- Excellent troubleshooting and problem-solving skills
- Proficient in SQL Queries to test the data after executing transactions
- Attending in Daily scrum calls, Story Analysis calls with onsite team to discuss the work progress.
- Participate in Daily standup calls, Bug Triage calls and status meetings.

DECLARATION:

I hereby declare that the above written particulars are true to the best of my knowledge and belief.
