PROJECT DETAILS

Client : Kaiser Permanente (US)

Title : POS(Point of Sale)

My Role : Manual and Automation Tester

Description: The point of sale (POS) or point of purchase (POP) is the time and place where a retail transaction is completed. Prescription Tracking, Secure Payment Processing, Sales and Profit Reporting. Any form of payment can be used, such as cash, debit cards, credit cards, and mobile payments. In other words, it is a computerized replacement for a cash register. A retail point of sale system typically includes a cash register which comprises a computer, monitor, cash drawer, receipt printer, customer display and a barcode scanner.

ACCOMPLISHMENTS

- PATENT: "Fiber Bragg grating based Non-Zero dispersion shifted fiber for novel ultra-high negative dispersion compensator" – Application: 201841011221, filed March 2018. Patent Approved.
- Optimized the testing process by developing an AI-based test automation tool; reduced testing time by 55%
- Got "Accenture Excellence Award" for the financial year FY19
- Received PINNACLE Award for the financial year FY20

ADDITIONAL INFORMATION

- In the capacity of Test Engineer, involved in both manual and automation testing
- Collaborated with scrum team to understand the requirements
- To publish the offshore status report, Execution status report to scrum team.
- Responsible to interact with onshore team, offshore team and developers to make sure that all the issues related to the quality of the application are Closed
- Preparing Test Scenarios and Test scripts based on Requirement Specifications or User Stories.
- Responsible for Smoke, Functional Testing, Regression Testing and Integration Testing.
- Execution of Test Scenarios and update the status to client
