PERSONAL PROJECTS

Employee's Data Application

- It is a desktop application designed to store data or details of all the employees in an organization or in a department with front end in **JAVA** and back-end in **MYSQL**.

Multi-Chatting Application

- It is a desktop application designed to do chatting between people or group of people using **socket programming** based on **Client/Server Architecture**

Splitwise App Algorithm Design

- It is inspired from splitwise app available on playstore. All of us daily faces the issue of splitting expenses with friends, roommates, group trips and more. This algorithm provides easiest way to share expenses with friends and family and stop stressing about "who owes who".
