## PROFESSIONAL EXPERIENCE

### (1) **Project Name:** CCB Gateway Automation(11 Month)

**Client** : North America

#### **Description:**

Banking loan application, multiple modules including KYC , Lending, Servicing, AOB etc. Each Module had a different regions like NAM, APAC, SG, IND. All modules are workflow based: External user can login to gateway app and submit enquiry regarding loan application and that request goes to internal user, they processed that request and ask for the document submission from client side.

#### **Role/Responsibilities:**

Identification of testcases for web browser and automating using Selenium, BDD Cucumber. Using Fluent Page Object Design pattern achieving method chaining and maintaining page Objects separately.

Execution of feature files on Jenkins(CICD).

Involved in giving demo to the Client Team as per the assigned user story.

### (2) **Project Name:** OBEM Automation(8 Month)

**Client** : (JCI)

#### **Description:**

Open Blue Enterprise Manager (OBEM) is a solution for cloud based building performance analytics and optimization. OBEM is smart building solution platform that collects data from the data points within the building that gives us insights about the utilization and helps monitor a building proactively.

Data is collected by Sensors or different data points mounted in the zone, wing or room through OBB . Then this data is transferred to OBC( open blue cloud) and finally it is reflected in OEM Cloud ( final cloud where OBEM is hosted)

#### **Role/Responsibilities:**

API Testing with Postman and Rest-Assured

Creating and executing test plans and test cases to ensure API functionality and performance with Hybrid Framework(Cucumber +TestNG).

Developing and maintaining automated test scripts using Java

Involved in giving demo to the Client Team as per the assigned Jira tickets.

### (3) **Project Name:** RoboMarkets Trading(1.2 Year)

**Domain** : Investment Banking

**Client** : RoboMarkets, UK

#### **Description:**

RoboMarkets offers three platform options, The most popular trading terminal with retail traders, the user-friendly interface offers a range of analytical tools and features:

One-click trading  
Interactive charting  
Customizable interface 3  
order execution types  
50 integrated technical indicators

**Role/Responsibilities:**

Identification of testcases for web browser and automating using Selenium, Data Driven Framework(TestNG). Using Page Object Design pattern achieving method chaining and maintaining page Objects separately.

Fetching Queries from Database (MySQL)

API Testing with Postman and Rest-Assured

Involved in giving demo to the Client Team as per the assigned user story.

**(4) Project Name: ICSS Solution Suite(1.0 Year)**

**Domain** : Telecom Billing

**Client** : On Care ,UK

**Description:**

With ICSS (Intelligent Customer Support Systems) you have immediate access to all your customer information; reducing your call times and enhancing the end user experience. With on demand access to provision products and services; technicians are able to complete the job and get back to their core work faster. Our easy-to-use billing solution streamlines the process and works to reduce any cash-flow interruption.

**Role/Responsibilities:**

Read all the documents and understand what needs to be tested.

Develop test cases and prioritize testing activities.

Execute all the test case and report defects, define severity and priority for each defect.

Carry out regression testing every time when changes are made to the code to fix defects.

Fetching Queries from Database (MySQL)

Perform API testing with Postman
