WORK EXPERIENCE

- Senior Software Engineer at Capgemini [June 2019 to till date]

PROJECT EXPERIENCE:

Company: Capgemini

Project Name	:	Farmers Insurance
Environment & Tools	:	Salesforce CRM, SOQL, Apex, Apex Data Loader, Tealeaf, Workbench, ALM
Role	:	Developer, Application Maintenance
Location	:	Hyderabad

Description:

Farmers Insurance Group is an American insurer group of auto mobiles, homes and small businesses. The project has the functionality of an Insurance System which includes Online Portals for both agents and end Users having different Systems for Policy Creation (CSS), Claims Creation (eFNOL) and Policy Status Checking (Claim Status Portal- CSP) and claim management portal(CMP). Status path is a claim status portal application where users can check status of the claims raised by them through eFNOL. This application supports different kinds of brand related policies. Agents and insured can access Claim Status Portal using existing (eFNOL) salesforce.com based community connecting from their respective parent website via SSO. Users will be accessing it either from parent sites or through CSP once they are registered in the website.

Contribution:

- Involved in providing enhancements by analyzing the existing Production Issues. Working on existing production issues.
- Provide day-to-day end-user support and assist users with proactive best practices to enhance and increase their knowledge of application.
- Worked with the onsite and offshore development teams to design solutions, provide technical support and perform code reviews.
- Identify and communicate risks, issues and potential solutions
- Worked on data migration tools like Apex Data Loader.
- Working on daily reports and documentations as per requirement.
- Worked on SOQL queries.
- Resolving the incidents within defined SLA period.
- Modifying Apex Codes as per client requirement

QUALIFICATION

B.Tech in **Mechanical Engineering** from BPUT University with an aggregate of 73% in the year 2018
