Assignment history

Truist (SunTrust Bank)

Channel Link Platform & Client Central | Aug 2016 - Present

Channel Link Platform is the major UI web application in Consumer Banking Segment for SunTrust Bank. It is a multi-tier application, used for Branch and Contact Center operations by 20000+ teammates which includes millions of transactions for serving its customers.

Education

B. Tech, Electronics Instrumentation & Control Engineering, NBKR Institute of Science and Technology - Vikrama Simhapuri University, Nellore, IN, 2014

Languages

English - Fluent

Telugu - Fluent

Hindi - Good

Client Central is used across all BB&T Bank Branches and Contact Centers. It provides services like Client on-boarding, Account opening and servicing for various segments and portfolios of the bank. This is the application which is being used by the new entity Truist post the merger of SunTrust and BB&T Bank.

Contribution:

- Working with business teams and involving pre-development analysis for project estimations and risks.
- Understanding of existing application system and performing design, deployments, development and Implementation activities for new products and financial regulations.
- Involved in development for multiple releases which include development throughout the application and cross work stream applications across the bank sector.
- Developed customized automation tools for development activities to cut down repetitive tasks.

IMAGINE COMMUNICATIONS

Imagine Communications - Landmark OSI | Apr 2016 - Aug 2016

Landmark OSI Traffic & Billing is a scalable, cross-enterprise solution designed to manage advertisement operations in multi-station/multi-channel environments across multiple markets and media platforms (television, radio channels & Internet).

Contribution:

- Involved in Major Enhancements which involve changes and unit testing across the product.
- Involved in Requirement gathering, analyse existing functionalities and creating design document as per the business needs.
- Developed win forms in .NET using C# & C++ as the code-behind language and SQL server using stored procedures for reading/updating records in the database.

SONY MOBILES

Sony Mobile Communications – SDT & ST | Jul 2015 - Apr 2016

Sales Deduction Tracking(SDT) - This application enables the business users to approve the business cases created for a sale order, keep the track of the budget assigned to each of the cases and create summary reports throughout the year.

Screening Tool (ST) - This tool is used to search through "blacklists" to check whether a Company/person is in that blacklist. The purpose of this document is to elaborate the requirements & technical flow of screening tool.

Contribution:

- Interaction with the client business team for gathering the business requirement and supporting business to define the scope of the demands in SDT.
- Analyse and fix the issues raised by the business users through the tickets using Ticketing Tool (Service Manager) for SDT.
- Involved in server migration activities from Windows Server 2003 SP2 to Windows Server 2012 R2 version for Screening Tool.
