Skill Set:

- Cloud Platform : **AWS**-IAM**,**EC2, S3, EBS, Security Groups, Route 53, VPC, Elastic Beanstalk

- Version Management Tools : **GIT**

- Integration Tools : **Jenkins**

- Monitoring Tools : **CloudWatch ,Splunk**

- Configuration Tools : **Ansible**

- Containers : **Docker**

- Functional Tool **:** **QTP/UFT**

- Test Management tool **:** **QC**

- Scripting **:** **VB Script**

Projects Handled:

Project #1:

Company	:	**Societe Generele Global Solution Pvt Ltd**
Project	:	BANCS
Client.	:	Societe Generale Paris.
Role	:	Software Engineer
Team	:	24

Description:

BANCS is the TCS Application which is used for CORPORATE ACTIONS. When a publicly traded company issues a corporate action, it is initiating a process that directly affects the securities issued by that company. Corporate actions can range from pressing financial matters, such as bankruptcy or liquidation, to a firm changing its name or trading symbol, in which case the firm must often update its CUSIP number, which is the identification number given to securities.

Responsibility:

- Migrating To cloud using Data Lake Architecture**, Preparing POC for Migration**
- Configured AWS Identity Access Management (IAM) Group and users for improved login authentication.
- Proficient in AWS services like VPC, EC2, S3, ELB,EBS, RDS, IAM, Cloud Formation, Route 53
- Automating Manual Test Cases using UFT Automation tool
- Execution of Test Cases, Test Planning for Releases, Defect Tracking
- Creating New Test cases and Maintaining Test Cases

Project #2:

Company	:	**DXC Technology**
Project	:	PRP Phoenix Aruba
Client	:	HPE
Role	:	Devops Engineer

Responsibility:

As a team member I was actively involved in the below phases of project

Worked on Building **S3** buckets and managed policies using **IAM**.

- Worked on administering **AWS** user identities, **IAM** permissions to various **AWS** resources, applying policies to users and roles.
- Worked on Managing Amazon instances by creating **AMI's** and performing administration and monitoring of Amazon instances using Amazon **CloudWatch**.
- Implemented a CI/CD pipeline involving **GIT,Jenkins, Docker ,Tomcat.**
- Configured and maintained Jenkins to implement the CI process and integrated the tool with Maven to schedule the builds and automated the deployment on the application servers using the "code deploy" plugin for Jenkins.
- Coordinate/assist developers with establishing and applying appropriate branching,   Merging conventions using GIT source control.

Project #3:

Company	:	**INTUIT**
Project	:	Customer conversation service(TurboTax)
Client	:	Intuit
Role	:	Devops and Cloud Engineer

Description:

The Conversation services enable user to start ,end and update conversations between multiple parties. Features include the ability to request voice calls,chats,callback request,video request.

Responsibility:

- Monitoring all the dashboards and if there is any issue or alerts got generated solving those issues.
- Worked on S3 buckets,IAM, EC2 instances.
- Spporting US shift and solving the PROD issues.
